

CA-TRON FASTSET

CURE SPEEDER FOR CYANOACRYLATES

• PRODUCT DESCRIPTION

CA-TRON FASTSET is a product where cure speed of CA-TRON cyanoacrylates is required. It can be used pre or post applied to the bond. CA-TRON FASTSET formulated for typical applications as wire/coil tacking, tamper proofing, sealing and potting applications with cyanoacrylates and so on.

• PROPERTIES

Aspect	Liquid
Colour	Clear
Viscosity (cps)	1
Density	0,79
Drying	<30 sec.

• INSTRUCTION FOR USE

Apply FASTSET to the area to be bonded by spray, brush, or dipping. Contaminated surfaces may need special cleaning or degreasing prior to activation to remove any soluble contamination. Allow the solvent time to flash off until the surfaces are completely dry (approximately 30 seconds). Apply the CA-TRON cyanoacrylate product immediately after drying.

The solvent can affect certain plastics and coatings. Plastics such as ABS, Polycarbonate, Polystyrene and Acrylic may degenerate when brought in contact with FASTSET. The affected surface area may get cloudy or sticky. It is recommended to check all surfaces for compatibility before use.

• STORAGE

Store at 8 °C to 21 °C. Shelf life 12 months.
