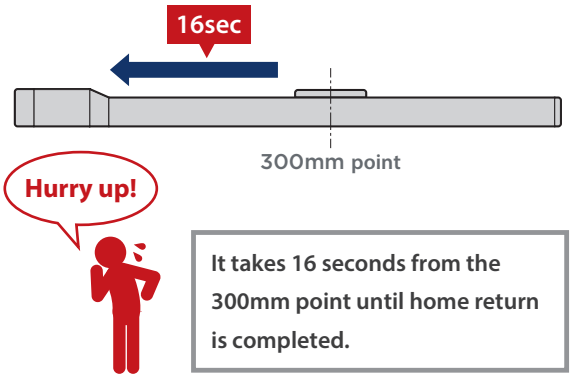
Next-Generation ROBO Cylinder

RCS4 BENEFITS

The advantages of using an absolute encoder

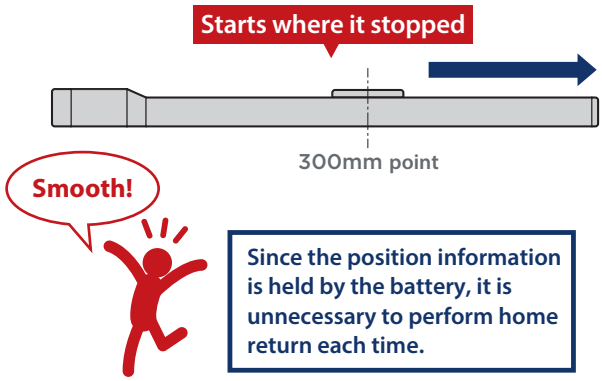
Home return not required

[For incremental encoder]



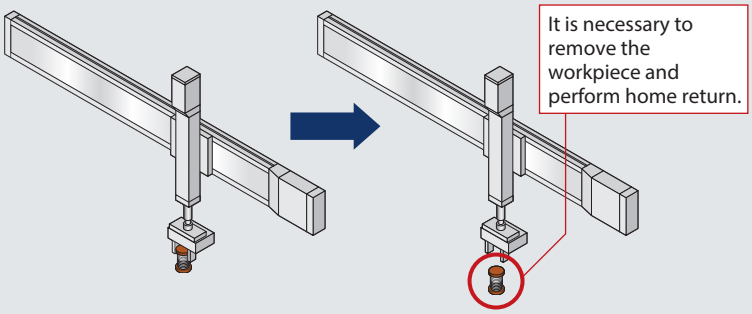
It takes 16 seconds from the 300mm point until home return is completed.

[For absolute encoder]



Since the position information is held by the battery, it is unnecessary to perform home return each time.

Normally, in emergency stops...



With absolute encoder

Since home return is unnecessary, there is no need to remove the workpiece and perform home return.

MERIT 1 The recovery time after device shutdown can be shortened.

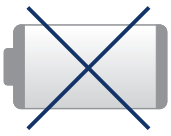
MERIT 2 This reduces the production costs.

+

The advantages of battery-less

Battery replacement not required

MERIT 1 The battery replacement processes and purchase costs can be reduced.



Replacement guidelines: Every 3 years

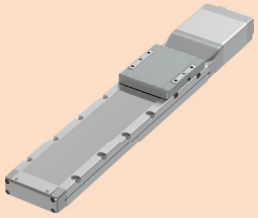
MERIT 2 Battery-related trouble such as “voltage drop” will not occur.

The advantages of using an absolute encoder. + **The advantages of battery-less** = **Battery-less Absolute Encoder**

An abundant lineup of 54 models

Slider Type SA

The slider on the top of the body actuates. Since it uses a base integrated ball circulating type with a built-in linear guide, it will be able to deal with moments in the pitching, yawing, and rolling directions.



Wide Slider Type WSA

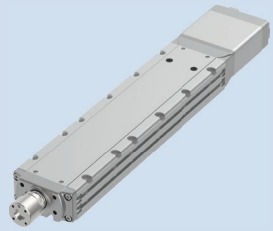
The slider on the top of the body actuates. The ball circulating linear guide is built into the wide body. External guides are not required, even for applications with large overhangs.

Rod Type RA

The rod actuates in the same manner as the rod type air cylinder. This actuator type has no built-in linear guide and costs the least among the RCS4 rod types.

Radial Cylinder RRA

The rod actuates in the same manner as the rod type air cylinder. Since ball circulating type linear guides are built in, it can take moment loads. External guides are not required.



Wide Radial Cylinder WRA

The rod actuates in the same manner as the rod type air cylinder. Due to a wide body and high rigidity rod, it can deal with up to four times the allowable torque on rod tip compared to a radial cylinder.

Table Type TA

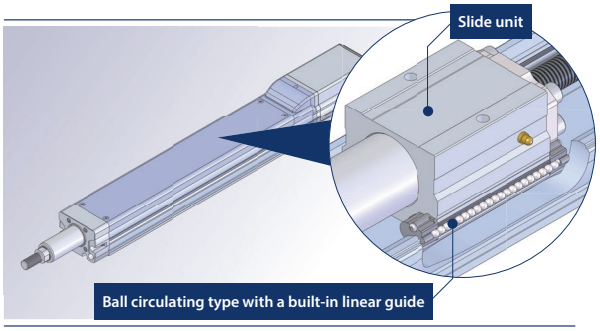
The table actuates on top of the main body. A ball circulating type linear guide is built into the table. Double block can be selected as an option, so that the two guide blocks increase the allowable dynamic moment.

Now hear this!

Radial Cylinder RRA

You may not believe it, but...

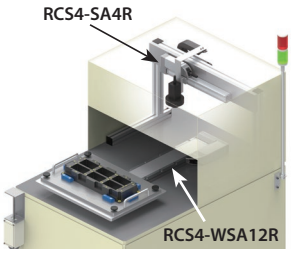
A guide is not required!



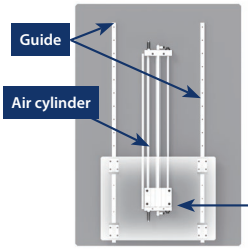
Since ball circulating type linear guides are built into the rod type body, it can take radial loads and moment loads. The equipment will be compact since an external guide is unnecessary.

Wide Slider Type WSA

Since it uses a built-in ball circulating type with a built-in linear guide inside its wide body, it will be able to deal with high load moments in the pitching, yawing, and rolling directions. Since it is flat, it is ideal when the space in the height direction is limited.



Device using an air cylinder



Device using ROBO Cylinder

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

Actuator Specifications

■ Lead and Payload

Model Number	Motor wattage (W)	Lead (mm)	Max. payload Horizontal (kg)	Max. payload Vertical (kg)	Rated thrust (N)	Stroke (mm)

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ8mm, rolled C10
Positioning repeatability (*1)	±0.01mm [±0.005mm]
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction: 13.0N·m, Mb direction: 18.6N·m, Mc direction: 25.3N·m
Allowable dynamic moment (*2)	Ma direction: 5.0N·m, Mb direction: 7.1N·m, Mc direction: 9.7N·m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

* Reference for overhang load length: Ma direction: 150mm or less, Mb, Mc direction: 150mm or less
(*1) Values in [ ] are for high precision specification.
(*2) Assumes a standard rated life of 5,000km. The service life will vary depending on operation and installation conditions. Please contact IAI America for details of the running life. See page 146 for moment load directions.
If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ10mm, rolled C10
Positioning repeatability (*1)	±0.01mm [±0.005mm]
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction: 48.5N·m, Mb direction: 69.3N·m, Mc direction: 103N·m
Allowable dynamic moment (*2)	Ma direction: 11.6N·m, Mb direction: 16.6N·m, Mc direction: 24.6N·m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

* Reference for overhang load length: Ma direction: 220mm or less, Mb, Mc direction: 220mm or less
(*1) Values in [ ] are for high precision (for lead 3/6/12/20) specification.
(*2) Assumes a standard rated life of 5,000km. The running life will vary depending on operation and installation conditions. Please contact IAI America for details of the running life.
See page 146 for moment load directions.
If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit.

Item	Description
Drive system	Ball screw ϕ16mm, rolled C10
Positioning repeatability (*1)	±0.01mm [±0.005mm]
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction 219N·m, Mb direction 219N·m, Mc direction 414N·m
Allowable dynamic moment (*2)	Ma direction 77.0N·m, Mb direction 77.0N·m, Mc direction 146N·m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

* Reference for overhang load length: Ma direction: 400mm or less, Mb, Mc direction: 400mm or less
(*1) Values in [ ] are for high precision (for lead 5/10/20) specification.
(*2) Assumes a standard rated life of 5,000km. The running life will vary depending on operation and installation conditions. Please contact IAI America for details of the running life.
See page 146 for moment load directions.
If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit.

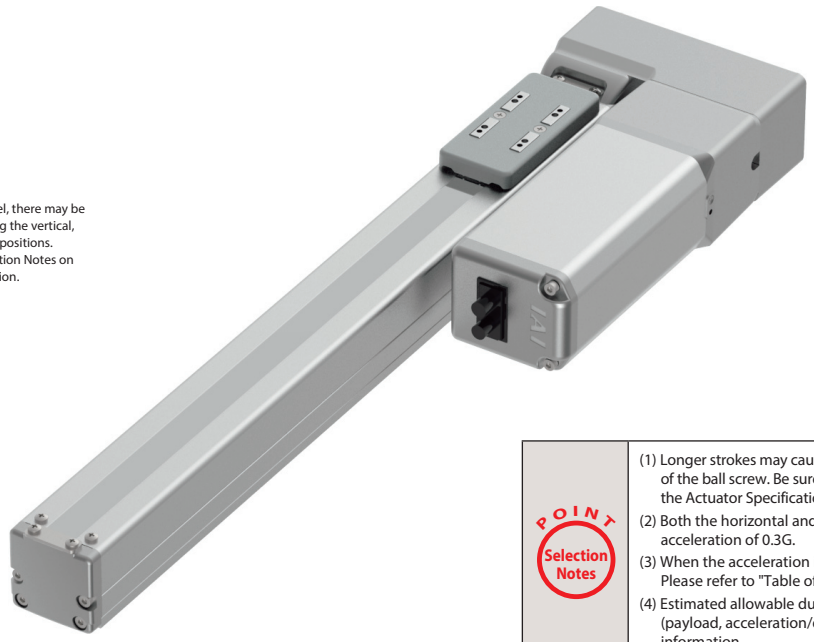
* Body width does not include the width of the side-mounted motor.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ12mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction 115N·m, Mb direction 115N·m, Mc direction 229N·m
Allowable dynamic moment (*1)	Ma direction 44.7N·m, Mb direction 44.7N·m, Mc direction 89.1N·m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

* Reference for overhang load length: Ma direction: 300mm or less, Mb, Mc direction: 300mm or less

(*1) Assumes a standard rated life of 5,000km. The running life will vary depending on operation and installation conditions. Please contact IAI America for details of the running life.

See page 146 for moment load directions. If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit.

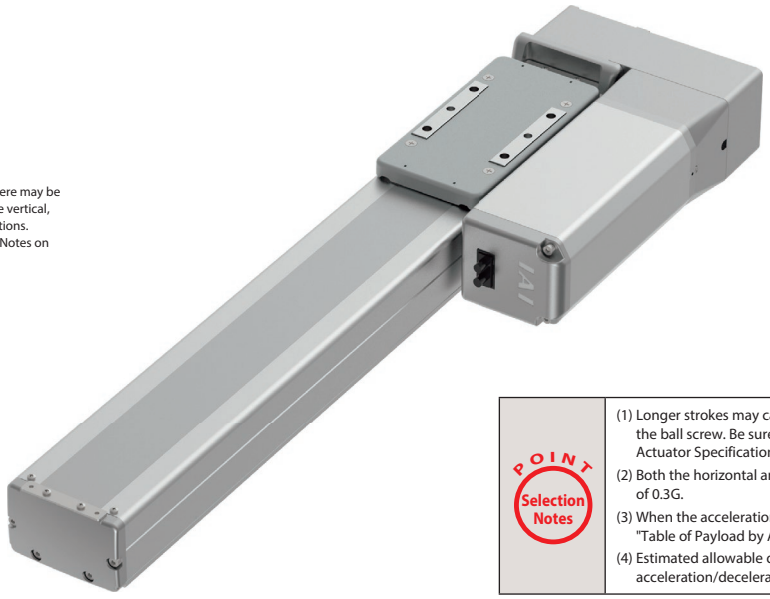
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

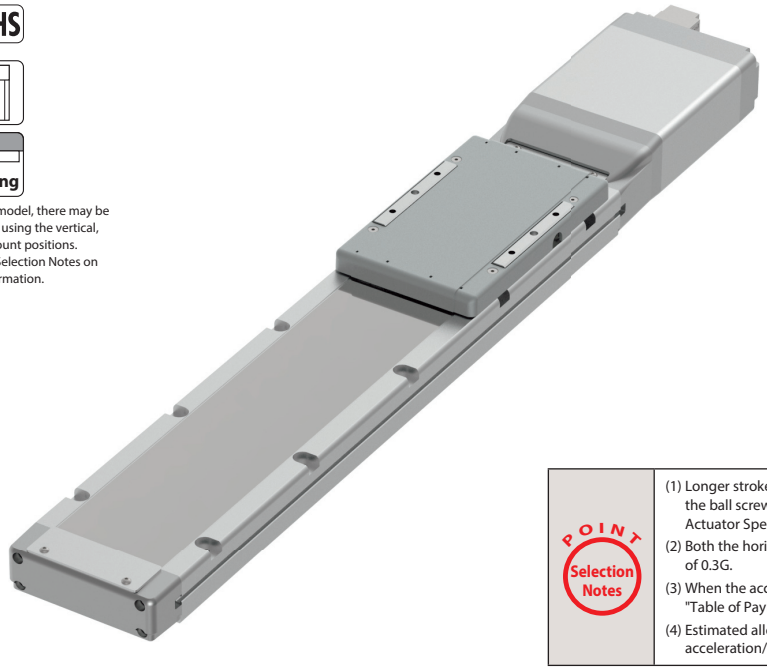
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

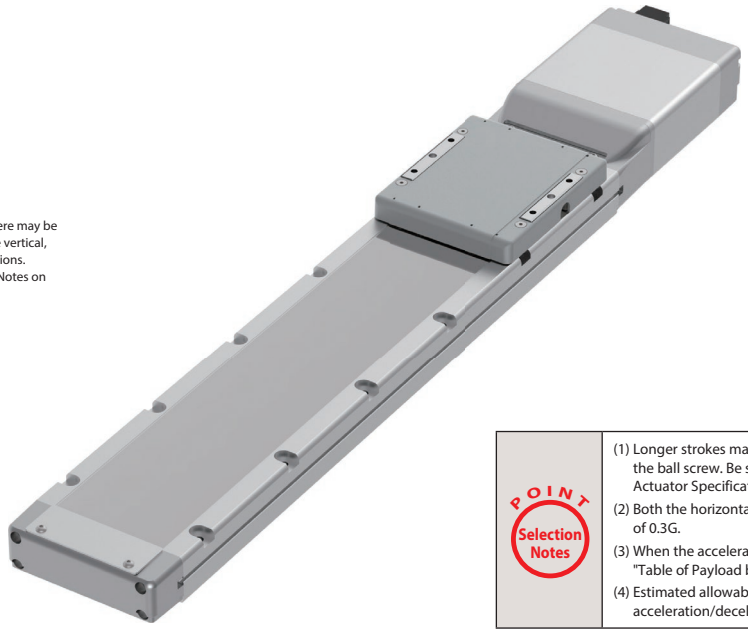
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

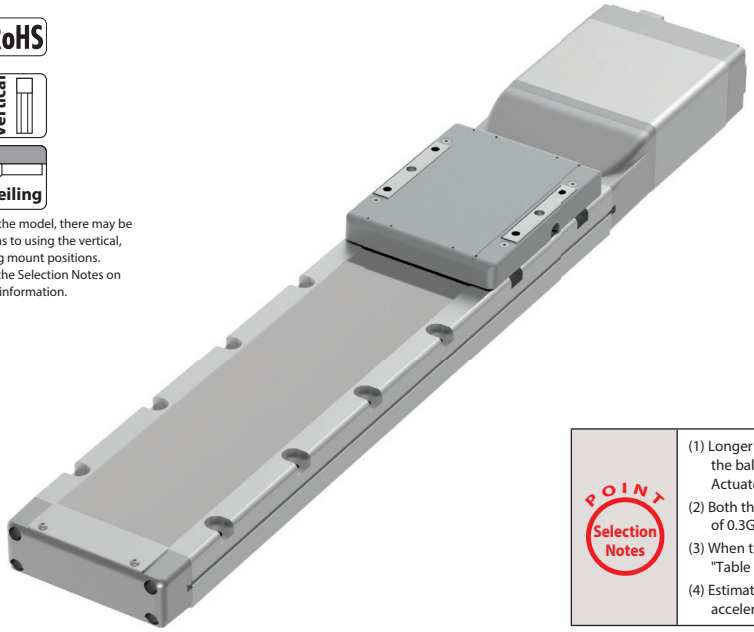
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.

(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.

(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.

(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ10mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ϕ25mm Material: Aluminum with hard alumite treatment
Allowable static torque on rod tip	1.5N·m
Max. angular displacement on rod tip (*1)	±1.0 deg.
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*1) This is the displacement angle of the rod tip (initial reference value) when the rod tip is fully retracted and the allowable static torque is applied at the rod tip.

Dimensions

CAD drawings can be downloaded from our website.
www.intelligentactuator.com

*1 When the rod is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end S.E: Stroke end
*2 The direction of width across flat varies depending on the product. Those flats cannot be used for vertical or horizontal reference plane.

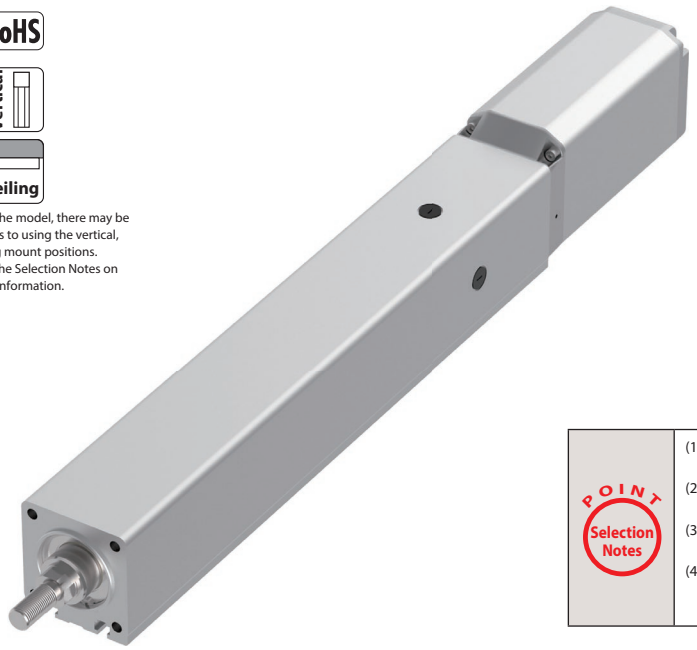
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ10mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ϕ25mm Material: Aluminum with hard alumite treatment
Allowable static torque on rod tip	1.5N·m
Max. angular displacement on rod tip (*1)	±1.0 deg.
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*1) This is the displacement angle of the rod tip (initial reference value) when the rod tip is fully retracted and the allowable static torque is applied at the rod tip.

CAD drawings can be downloaded from our website.
www.intelligentactuator.com

*1 When the rod is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end S.E: Stroke end
*2 The direction of width across flat varies depending on the product. Those flats cannot be used for vertical or horizontal reference plane.

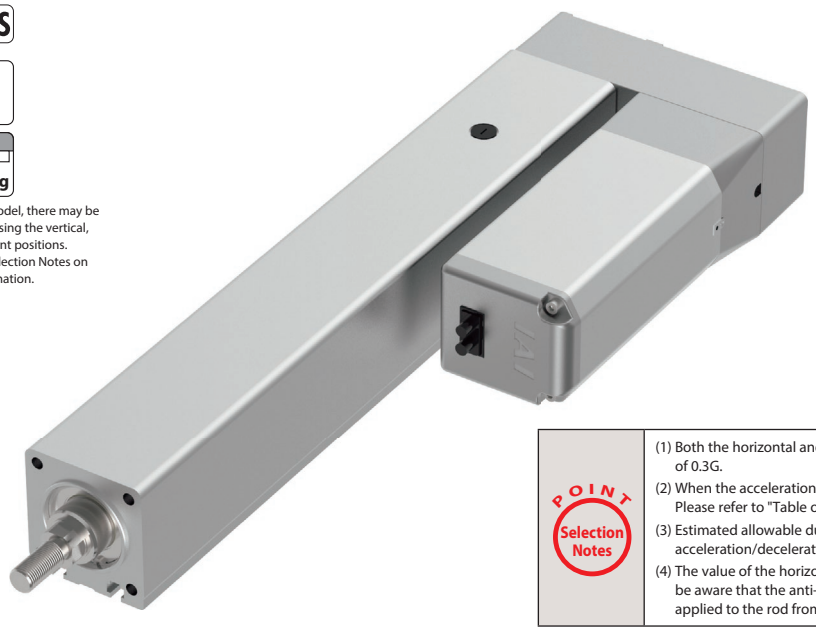
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.145 and after for the allowable load mass.

RCS4-RRA8C

Battery-less Absolute | Motor Unit Type | Coupled Motor | Body Width 90 mm | 200V AC Servo Motor

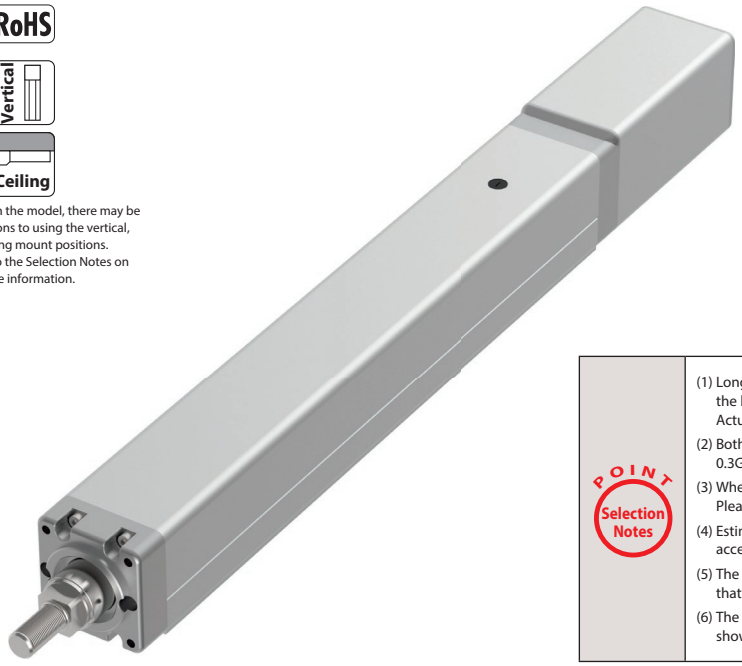
■ Model Specification Items

RCS4 — RRA8C — WA — 400 — ☐ — ☐ — T2 — ☐ — ☐

Series	Type	Encoder Type	Motor Type	Lead	Stroke	Applicable Controllers	Cable Length	Options
RCS4	RRA8C	WA: Battery-less Absolute	400: Servo motor 400W	30:30mm 20:20mm 10:10mm 5: 5mm	50:50mm ↓ 700:700mm (50mm increments)	T2:SCON SSEL XSEL-P/Q XSEL-RA/SA	N : None P : 1m S : 3m M: 5m X☐☐ : Specified Length R☐☐ : Robot Cable	Refer to Options table below.

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G. (0.2G for lead 5).
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(5) The value of the maximum payload assumes that there is an external guide and that the rod is not subjected to external force other than in the moving direction.
(6) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.145 and after for the allowable load mass.

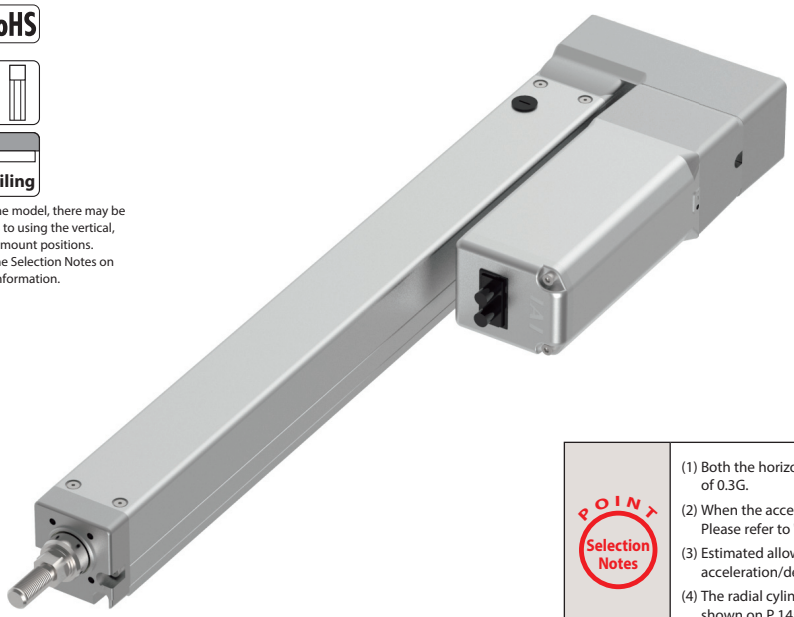
* Body width does not include the width of the side-mounted motor.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.145 and after for the allowable load mass.

RCS4-RRA8R

Battery-less Absolute | Motor Unit Type | Side-mounted Motor | Body Width 90* mm | 200V AC Servo Motor

■ Model Specification Items

RCS4 — **RRA8R** — **WA** — **400** — □ — □ — □ — **T2** — □ — □

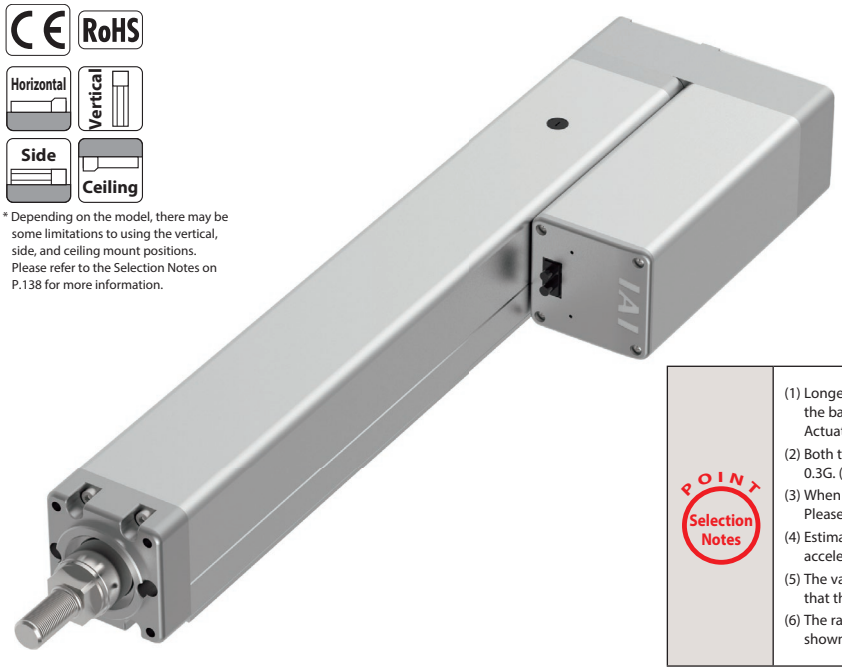
Series	Type	Encoder Type	Motor Type	Lead	Stroke	Applicable Controllers	Cable Length	Options
		WA: Battery-less Absolute	400: Servo motor 400W	30:30mm 20:20mm 10:10mm 5: 5mm	50:50mm ↕ 700:700mm (50mm increments)	T2:SCON SSEL XSEL-P/Q XSEL-RA/SA	N : None P : 1m S : 3m M: 5m X□□ : Specified Length R□□ : Robot Cable	Refer to Options table below.

* Body width does not include the width of the side-mounted motor.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below

(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G. (0.2G for lead 5).

(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.

(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

(5) The value of the maximum payload assumes that there is an external guide and that the rod is not subjected to external force other than in the moving direction.

(6) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.145 and after for the allowable load mass.

Actuator Specifications

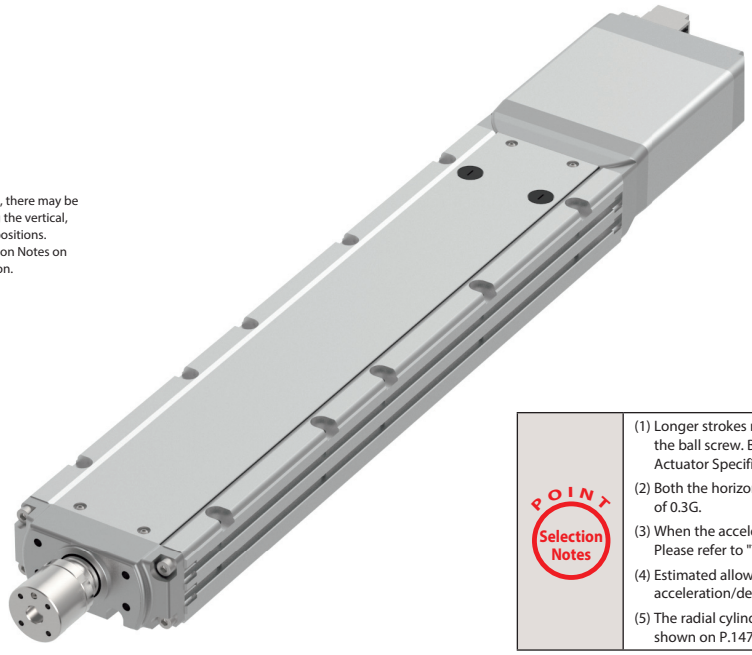
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.

(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.

(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.

(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

(5) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.147 and after for the allowable load mass.

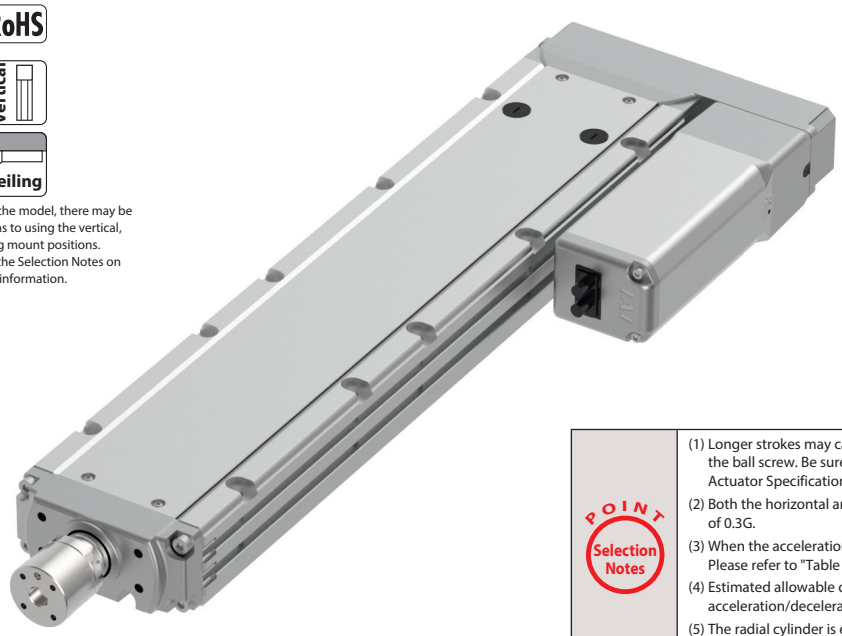
* Body width does not include the width of the side-mounted motor.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.147 and after for the allowable load mass.

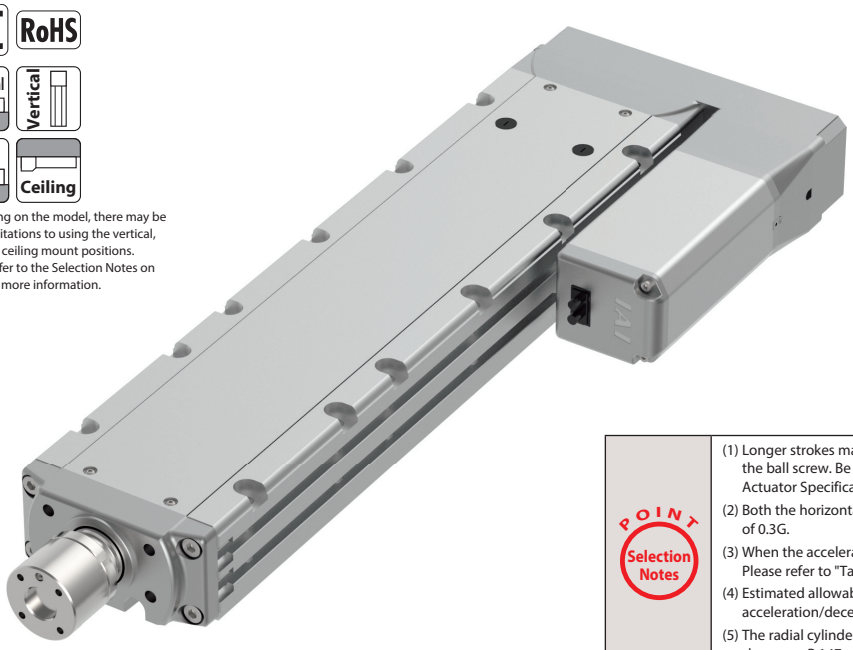
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(5) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.147 and after for the allowable load mass.

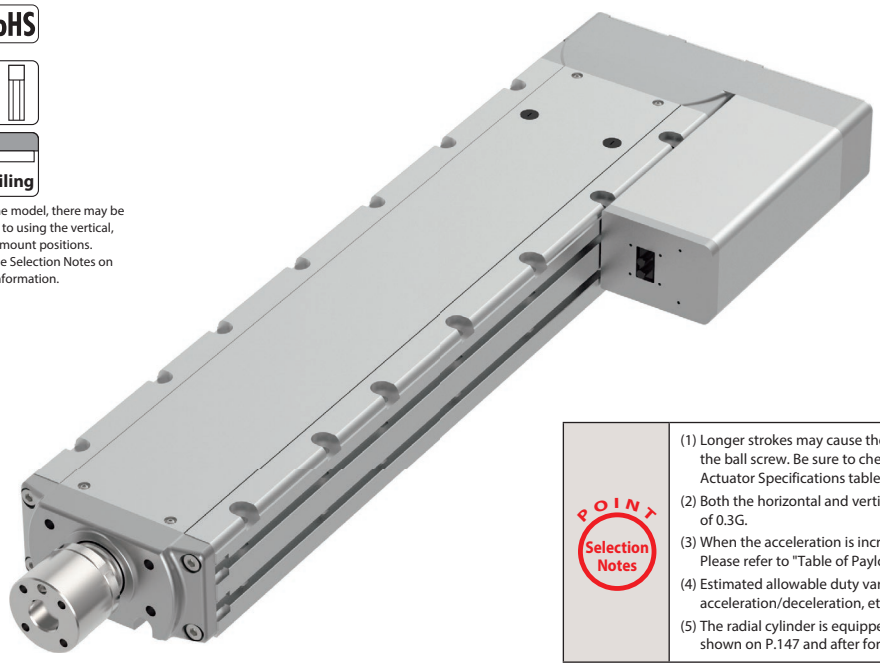
* Body width does not include the width of the side-mounted motor.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(5) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.147 and after for the allowable load mass.

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) Please refer to the graphs shown on P.148 for the allowable load mass.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ10mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction 32.3N·m, Mb direction 46.2N·m, Mc direction 68.3N·m
Allowable dynamic moment (*1)	Ma direction 11.6N·m, Mb direction 16.6N·m, Mc direction 24.6N·m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*1) Assumes a standard rated life of 5,000km. The running life will vary depending on operation and installation conditions.
Please contact IAI America for details of the running life.
See page 146 for moment load directions.
If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit.
Please refer to the instruction manual for the amount of displacement of the table.

CAD drawings can be downloaded from our website.
www.intelligentactuator.com

*1 When the table is returning to its home position, please be mindful of possible interference from surrounding objects, as it will travel until it reaches the M.E.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ12mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction 620N·m, Mb direction 620N·m, Mc direction 458N·m
Allowable dynamic moment (*1)	Ma direction 196N·m, Mb direction 196N·m, Mc direction 145N·m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*1) Assumes a standard rated life of 5,000km. The running life will vary depending on operation and installation conditions. Please contact IAI America for details of the running life.
See page 146 for moment load directions.
If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit. Please refer to the instruction manual for the amount of displacement of the table.

Dimensions

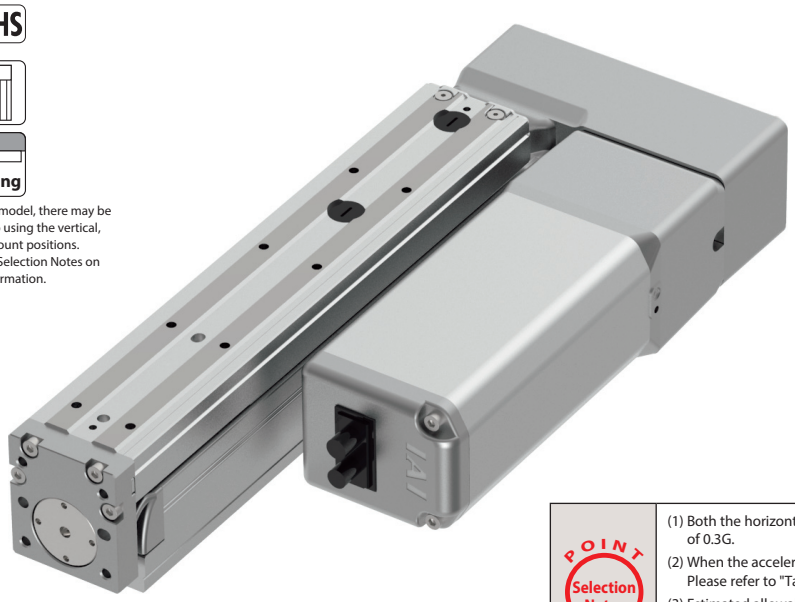
CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.



POINT Selection Notes

(1) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(2) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(3) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(4) Please refer to the graphs shown on P.148 for the allowable load mass.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.
(5) Please refer to the graphs shown on P.148 for the allowable load mass.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.

(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.

(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.

(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.
(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.
(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.
(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

Actuator Specifications

Item	Description
Drive system	Ball screw ϕ10mm, rolled C10
Positioning repeatability (*1)	±0.01mm [±0.005mm]
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Allowable static moment	Ma direction 311N·m, Mb direction 311N·m, Mc direction 827N·m
Allowable dynamic moment (*2)	Ma direction 87.5N·m, Mb direction 87.5N·m, Mc direction 233N·m
Cleanliness	Class 10 (Fed.Std.209D), class 2.5 or equivalent (ISO 14644-1 Standard)
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

* Reference for overhang load length: Ma direction: 450mm or less, Mb, Mc direction: 450mm or less
(*1) Values in [ ] are for high precision specification.
(*2) Assumes a standard rated life of 5,000km. The running life will vary depending on operation and installation conditions. Please contact IAI America for details of the running life.
See page 146 for moment load directions.
If the moment loads in Ma/Mb/Mc are within the allowable ranges, there is no overhang length limit.

CE RoHS

Horizontal | Vertical | Side | Ceiling

* Depending on the model, there may be some limitations to using the vertical, side, and ceiling mount positions. Please refer to the Selection Notes on P.138 for more information.

POINT Selection Notes

(1) Longer strokes may cause the maximum speed to decrease due to resonance of the ball screw. Be sure to check the maximum speed of the desired stroke in the Actuator Specifications table, which can be found below.

(2) Both the horizontal and vertical payloads assume operation at an acceleration of 0.3G.

(3) When the acceleration is increased, the payload will be reduced. Please refer to "Table of Payload by Acceleration" on P.139 for more details.

(4) Estimated allowable duty varies depending on operating conditions (payload, acceleration/deceleration, etc.). Please refer to P. 149 for more information.

				Positioner	Pulse train	Program	Network * Option		
SCON-CB/CGB		1	Single phase 200VAC	●	●	–	DeviceNet, CC-Link, PROFIBUS	512 (768 for network spec.)	Please contact IAI for more information.
SCON-LC/LCG		1		–	–	●	CompoNet, MECHATROLINK, EtherCAT, EtherNet/IP, PROFINET	512 (768 for network spec.)	
SSEL-CS		2	Single phase 100V/200VAC	●	–	●		20000	
XSEL-P/Q/RA/SA		8	Single phase 200VAC Three-phase 200VAC	–	–	●		55000 (Depending on the type)	

Note: The type of compatible networks will vary depending on the controller. Please refer to the reference page for more information.

Brake

Model **B**

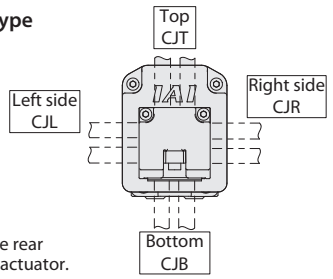
Description When the actuator is mounted vertically, this works as a holding mechanism that prevents the slider, rod, or table from falling and damaging any attachments when the power or servo is turned off.

Cable exit direction

Model **CJT / CJR / CJL / CJB / CJO**

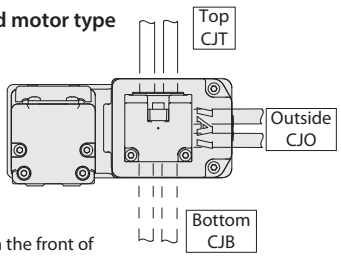
Description This option allows you to change the exit direction of the motor-encoder cable to top, bottom, left, or right.

Straight motor type



* When seen from the rear (motor side) of the actuator.

Side-mounted motor type



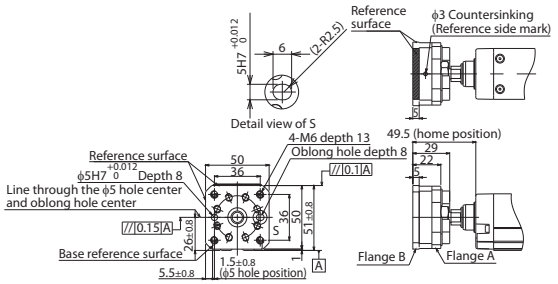
* When seen from the front of the actuator.

Tip adapter (Flange)

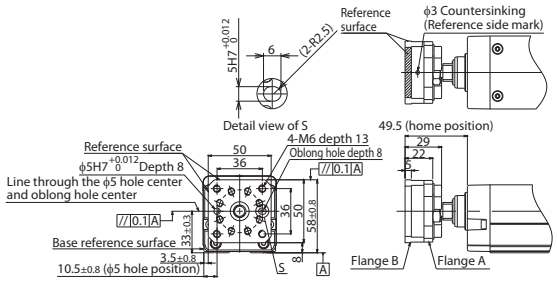
Model **FFA**

Description A rod tip tooling adapter with 4 threaded holes.

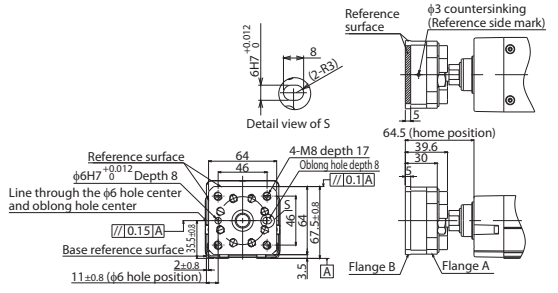
RCS4-RRA4□
Model Name: RCP6-FFA-RRA4



RCS4-RRA6□
Model Name: RCP6-FFA-RRA6



RCS4-RRA7□
Model Name: RCP6-FFA-RRA7



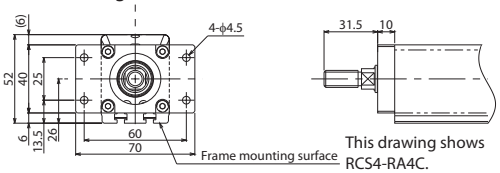
IAI

Model **FL**

Description A bracket that attaches to the actuator body with bolts. * Be sure to confirm with the Selection Notes (P.138).

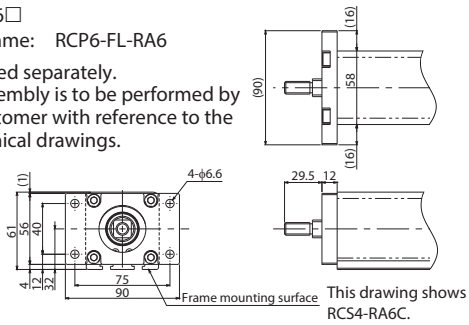
RCS4-RA4□
Model Name: RCP6-FL-RA4

* Furnished separately.
The assembly is to be performed by the customer with reference to the mechanical drawings.



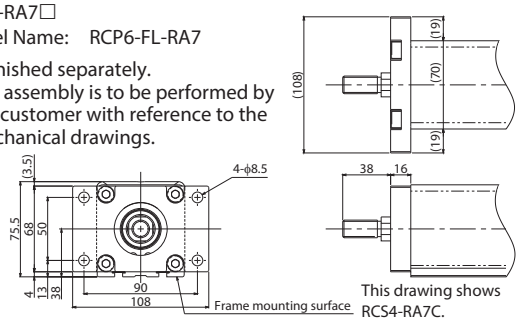
RCS4-RA6□
Model Name: RCP6-FL-RA6

* Furnished separately.
The assembly is to be performed by the customer with reference to the mechanical drawings.



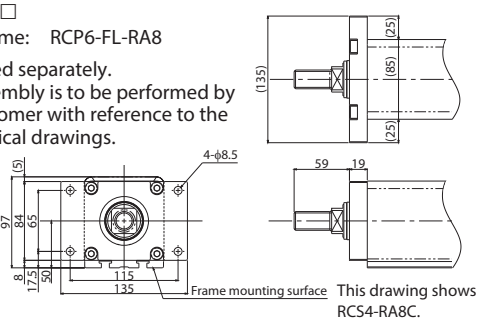
RCS4-RA7□
Model Name: RCP6-FL-RA7

* Furnished separately.
The assembly is to be performed by the customer with reference to the mechanical drawings.

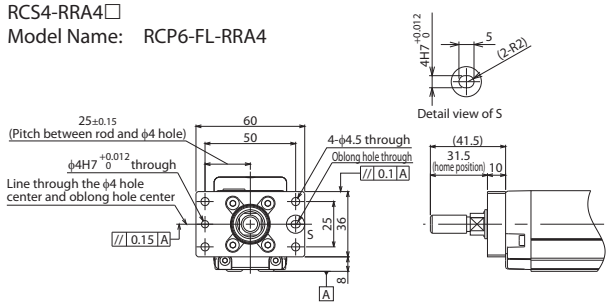


RCS4-RA8□
Model Name: RCP6-FL-RA8

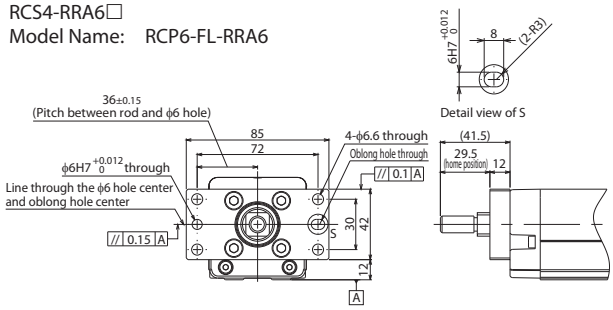
* Furnished separately.
The assembly is to be performed by the customer with reference to the mechanical drawings.



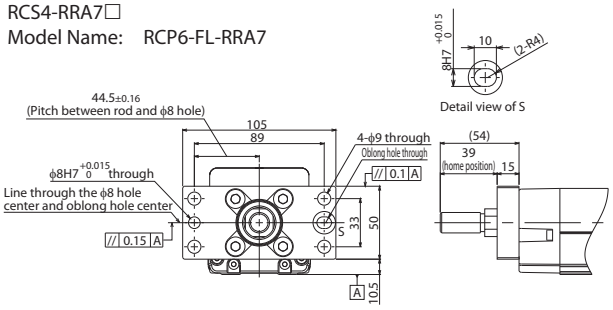
RCS4-RRA4□
Model Name: RCP6-FL-RRA4



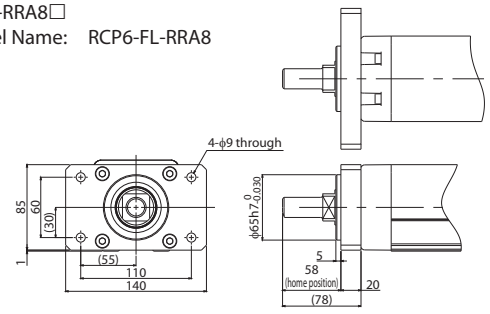
RCS4-RRA6□
Model Name: RCP6-FL-RRA6



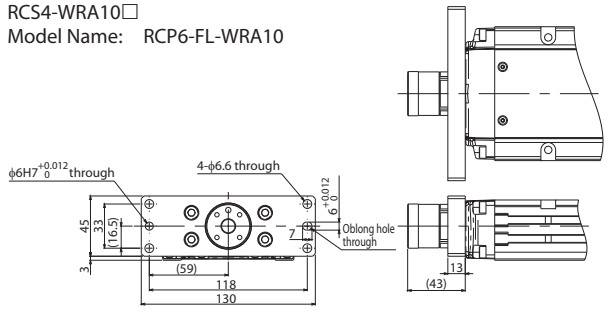
RCS4-RRA7□
Model Name: RCP6-FL-RRA7



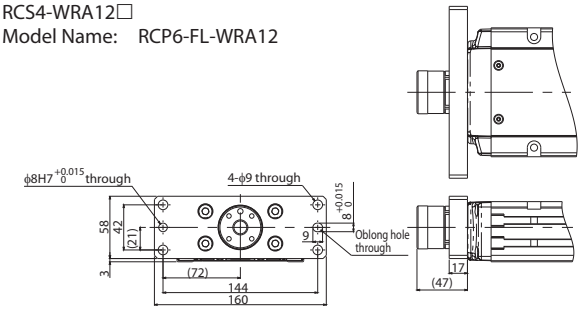
RCS4-RRA8□
Model Name: RCP6-FL-RRA8



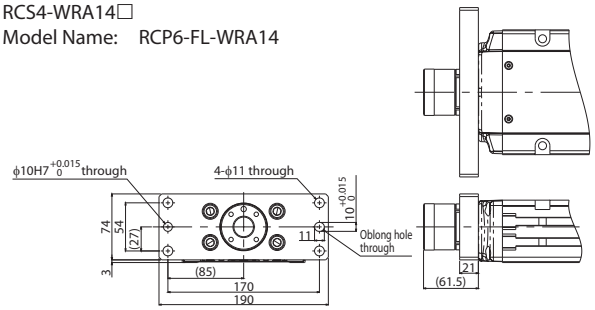
RCS4-WRA10□
Model Name: RCP6-FL-WRA10



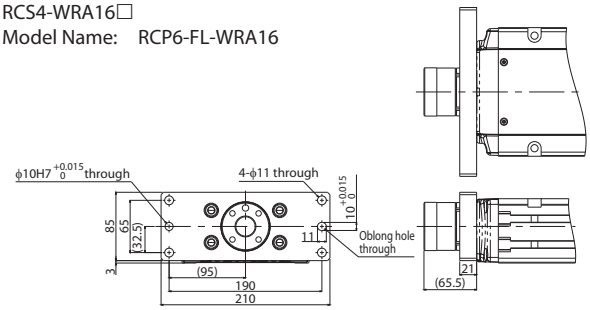
RCS4-WRA12□
Model Name: RCP6-FL-WRA12



RCS4-WRA14□
Model Name: RCP6-FL-WRA14



RCS4-WRA16□
Model Name: RCP6-FL-WRA16

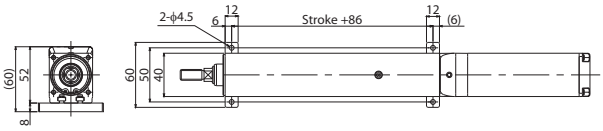


Foot bracket

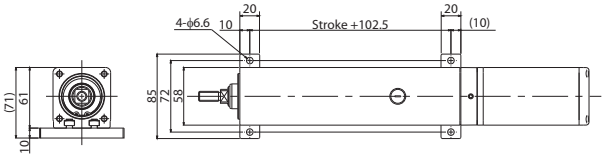
Model **FT**

Description This is a bracket used to fix the actuator with bolts from the top side. (Bolts are tightened from the top, not from the bottom)
For slider type actuators, when the moment load is large, please attach the foot brackets on all the mounting holes on the actuator.
The actuator body may be twisted or deformed if insufficient mounting foot brackets are used. Actuator life could also be shortened.
* Refer to the installation dimensions in the actuator drawing for the installation pitch between the foot brackets.

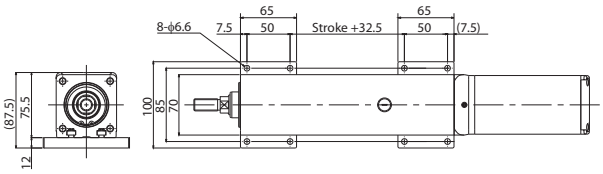
RCS4-RA4C
Model Name: RCP6-FT-RA4C



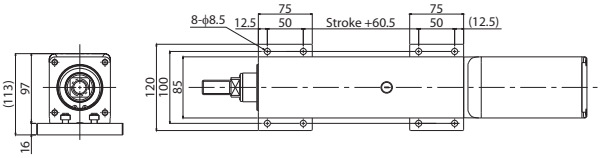
RCS4-RA6C
Model Name: RCP6-FT-RA6C



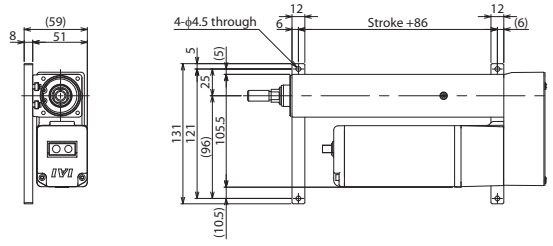
RCS4-RA7C
Model Name: RCP6-FT-RA7C



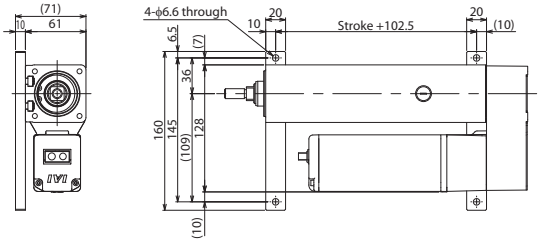
RCS4-RA8C
Model Name: RCP6-FT-RA8C



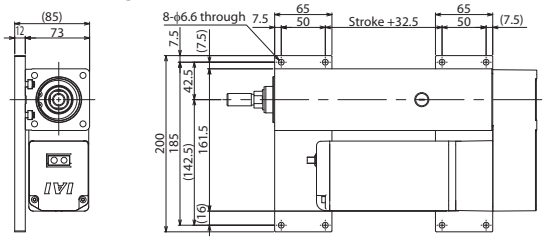
RCS4-RA4R
Model Name: RCP6-FT-RA4R-3 (For the motor side-mounted to the right/left)



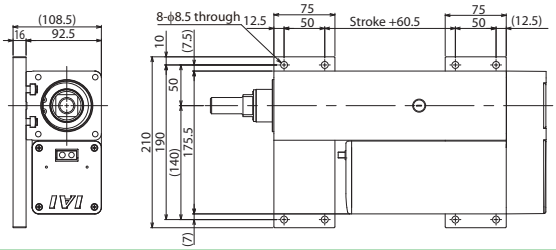
RCS4-RA6R
Model Name: RCS4-FT-RA6R (For the motor side-mounted to the right/left)



RCS4-RA7R
Model Name: RCS4-FT-RA7R (For the motor side-mounted to the right/left)



RCS4-RA8R
Model Name: RCP6-FT-RA8R-2 (For the motor side-mounted to the right/left)



High-precision Specification

Model **HPR**

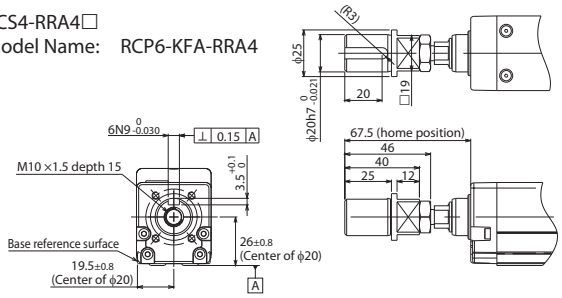
Description The positioning repeatability of the standard specification of the slider and wide slider types is ±0.01mm.
If this option is selected, the positioning repeatability can be ±0.005mm. * This option can be selected for actuators with lead 20mm or less.

Tip adapter (Keyway)

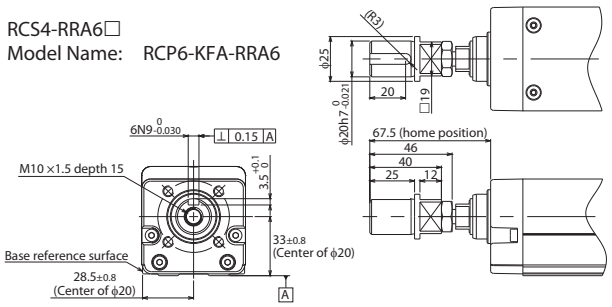
Model **KFA**

Description A rod tip adapter with 1 threaded hole and a parallel keyway.

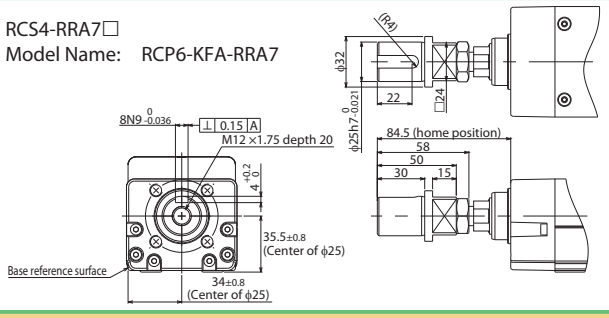
RCS4-RRA4□
Model Name: RCP6-KFA-RRA4



RCS4-RRA6□
Model Name: RCP6-KFA-RRA6



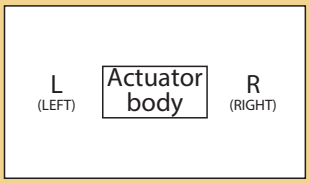
RCS4-RRA7□
Model Name: RCP6-KFA-RRA7



Side-mounted motor direction

Model **ML / MR**

Description This allows you to specify the direction of the side-mounted motor type.
As viewed from the motor side of the actuator, side-mounting to left is ML and right is MR.

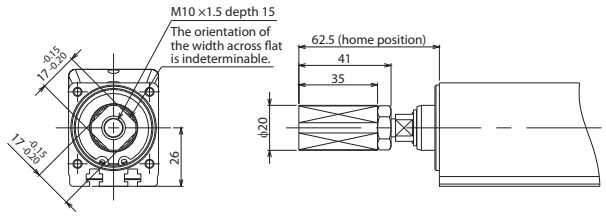


Tip adapter (Internal thread)

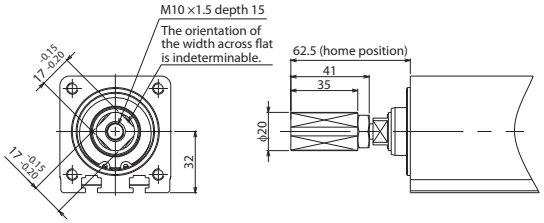
Model **NFA**

Description A rod tip tooling adapter with 1 threaded hole.

RCS4-RA4□
Model Name: RCP6-NFA-RA4



RCS4-RA6□
Model Name: RCP6-NFA-RA6



RCS4-RA7□

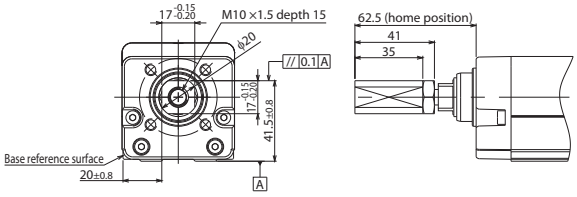
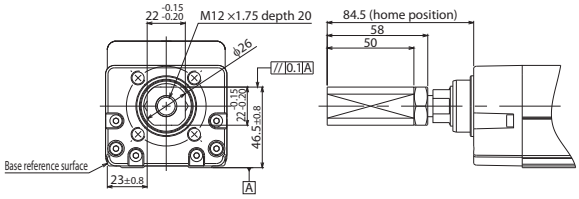
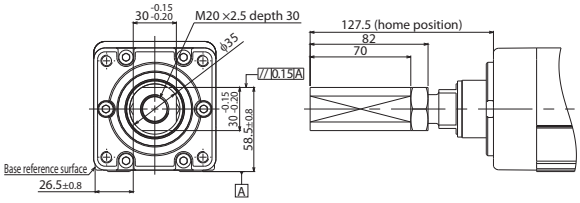
RCS4-RRA6□
Model Name: RCP6-NFA-RRA6



RCS4-RRA7□
Model Name: RCP6-NFA-RRA7



RCS4-RRA8□
Model Name: RCP6-NFA-RRA8



Non-motor End Specification

Model **NM**

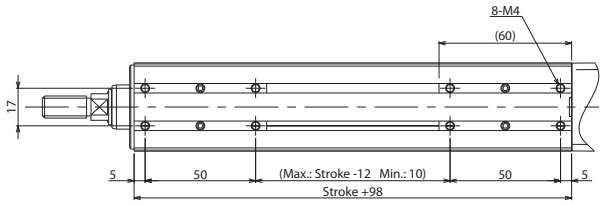
Description The standard specification home position is set by the slider, rod, and table on the motor side, but there is the option for the home position to be on the other side to accommodate variations in equipment layout, etc. (Please note that changing the home position after the actuator is manufactured and shipped from the factory may require the products to be sent back to IAI for re-setting.)

T-slot nut bar

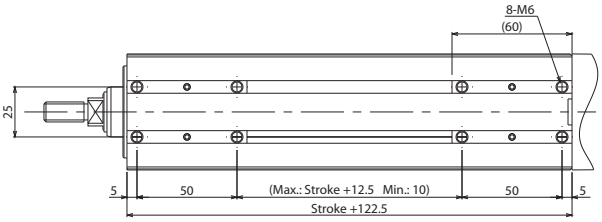
Model **NTB / NTBL / NTBR**

Description T-slot nut bar is a bar-shaped bracket which is to be inserted into the actuator's T-slot. There are tapped mounting holes on the T-slot nut bar. From the motor-side view, NTBL is inserted on the left side, and NTBR is inserted on the right.
* Only NTB can be selected for Rod type (RA), while either NTBL (for the actuator with its motor side-mounted to the right) or NTBR (for the actuator with its motor side-mounted to the left) can be selected for wide radial cylinder type (WRA).

RCS4-RA4□
Model Name: RCP6-NTB-RA4



RCS4-RA6□
Model Name: RCP6-NTB-RA6



RCS4-RA7□
Model Name: RCP6-NTB-RA7

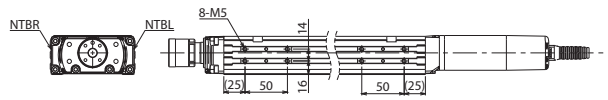
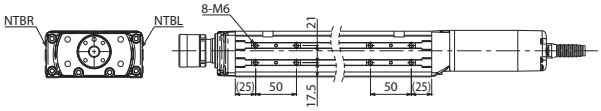
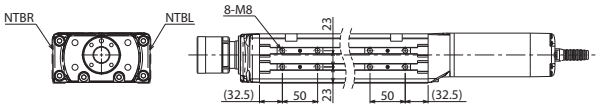
Model Name: RCP6-NTB-WRA10



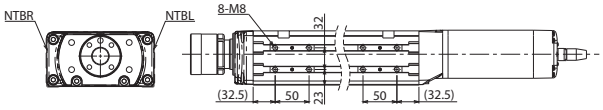
RCS4-WRA12□
Model Name: RCP6-NTB-WRA12



RCS4-WRA14□
Model Name: RCP6-NTB-WRA14



RCS4-WRA16□
Model Name: RCP6-NTB-WRA16



Back mounting plate

Model **RP**

Description A metal bracket (plate) for fixing the back of the side-mounted motor type to equipment.
* Please refer to product specification pages for drawings.

Slider Roller Specification

Model **SR**

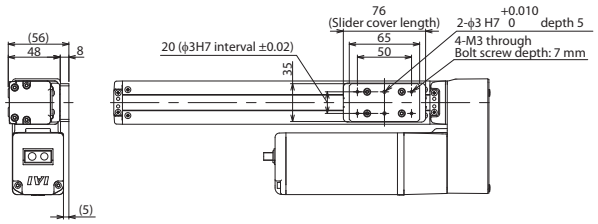
Description Changes the slider structure of the standard slider type to the same roller structure of the cleanroom specification.
Changing to roller specification will make the external view and dimensions of the slider cover the same as the cleanroom specification.

Slider spacer

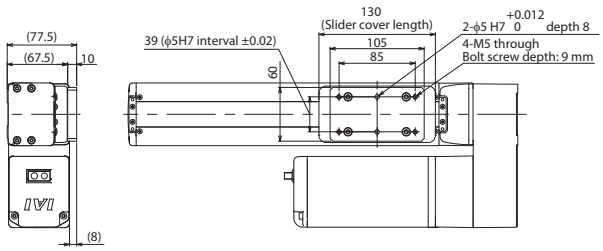
Model **SS**

Description This option changes the top of the slider position to be higher than the motor height.

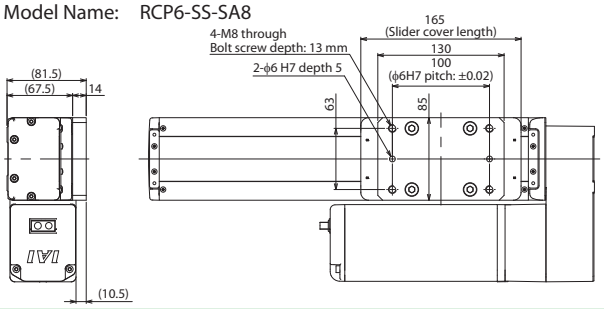
RCS4-SA4R
Model Name: RCS4-SS-SA4



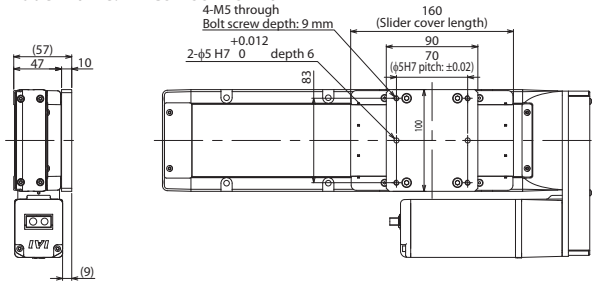
RCS4-SA7R
Model Name: RCP6-SS-SA7



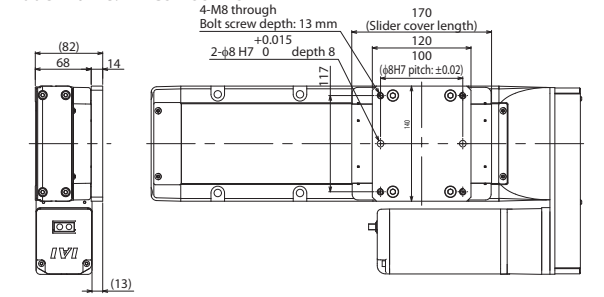
RCS4-SA8R
Model Name: RCP6-SS-SA8



RCS4-WSA10R
Model Name: RCS4-SS-WSA10



RCS4-WSA14R
Model Name: RCS4-SS-WSA14



Vacuum joint mounting position opposite

Model **VR**

Description As standard, the vacuum joint is installed on the left side of the body when seen from the motor side, but this option changes it to the right side (opposite side).

Double Slider Specification

Model **W**

Description This option adds a free slider not connected to the ball screw or drive belt.
Using a double slider enables increased moment and overhang load length.
* For the allowable dynamic moment and overhang load length of the double slider, refer to P.248.

■ Cautions When Selecting the Rod Attachment Option

Model	Options		
RCS4	FL	NTBL	NTBR
RA4R	①	–	–
RA6R	①	–	–
RA7R	①	–	–
RA8R	②	–	–

Model	Options		
RCS4	FL	NTBL	NTBR
RRA4R	③	–	–
RRA6R	④	–	–
RRA7R	⑤	–	–
RRA8R	②	–	–

Model	Options		
RCS4	FL	NTBL	NTBR
WRA10R	②	⑥	⑦
WRA12R	②	⑥	⑦
WRA14R	②	⑥	⑦
WRA16R	②	⑥	⑦

Be sure to check the following conditions when selecting options.

① Cannot be selected for 100st or less
② Cannot be selected for 50st
③ Cannot be selected for 110st or less
④ Cannot be selected for 65st
⑤ Cannot be selected for 70st
⑥ Can only be selected when MR is selected
⑦ Can only be selected when ML is selected

● The flange rod attachment option cannot be used on side mounting position for RCS4-RRA8R when the following strokes are selected.

· RCS4-RRA8R: 50 to 100st (standard/with brake)

■ Mounting Orientation

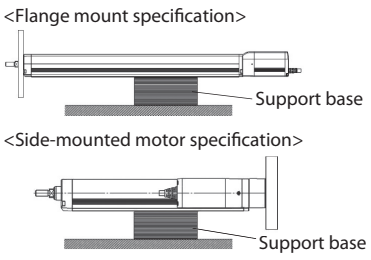
○: Can be installed △: Daily inspection required

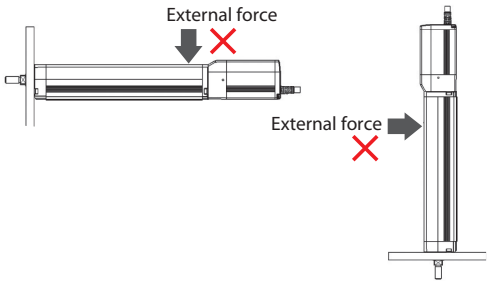
Classification	Series	Type	Mounting orientation: Horizontal mounting on flat surface	Vertical mounting (*1)	Side mounting	Ceiling mounting
Standard specification	RCS4	SA/WSA	○	○	△ (*2)	△ (*2)
		RA/RRA/WRA	○ (*3)	○	○	○
		TA	○	○	○	○
Cleanroom Specification	RCS4CR	SA/WSA	○	○	△ (*4)	△ (*4)

*1. When mounting vertically, please install the motor on the top if possible. While installing the motor on the bottom will not cause problems during normal operation, long periods of inactivity may cause the grease to separate, flow into the motor unit, and cause problems on rare occasions.

*2. While installation in the side and ceiling mount positions are available, this may cause slack or misalignment in the stainless steel sheet. Continuing to use it this way could cause the stainless steel sheet to break. Please inspect it daily and adjust the sheet if any slack or misalignment is found.

*3. Please install a support block when front mounting or back mounting a horizontally mounted actuator. Depending on the operation/installation conditions, vibration may cause damage to the actuator body. Do not fix the side-mounted motor specification only at the back of the reverse bracket. Fix the base with a support block, etc. If the actuator will experience external force or is being used in conjunction with a Cartesian robot, etc., please use the mounting holes on the base of the actuator to secure it into place.





*4. Cleanliness class 10 may not be maintained in side mounting or ceiling mounting if slack or misalignment occurs in the stainless steel sheet. Please inspect it daily and adjust the sheet if any slack or misalignment is found.

■ Tables of Payload by Acceleration

The tables below show the max. payload at each acceleration/deceleration for different models. Please select a model that satisfies the operational conditions you desire.

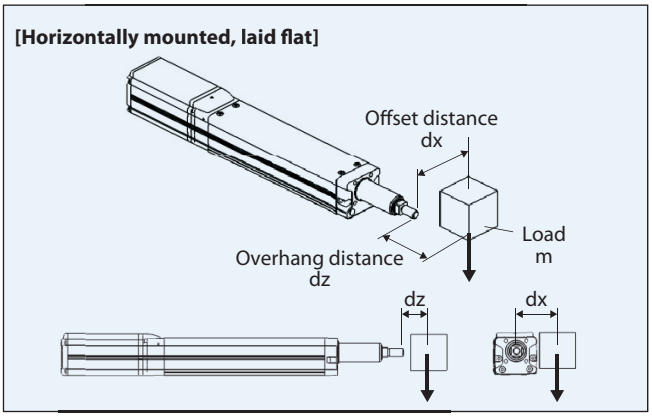
Selection Guideline for Allowable Load Mass

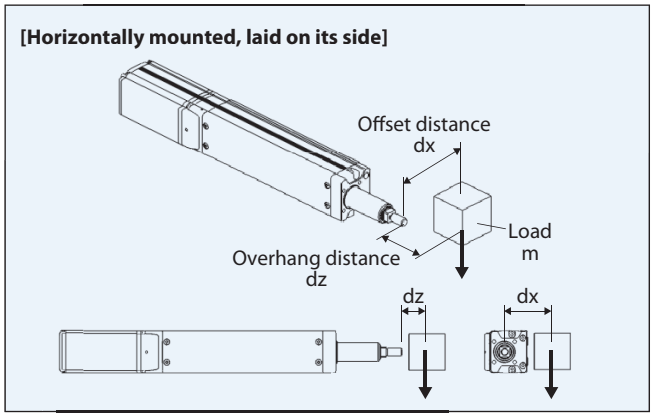
The radial cylinder has a built-in guide, so loads up to a certain level can be applied to the rod without using an external guide.
Refer to the graphs below for the allowable load mass.
If the allowable load will be exceeded under the required operating conditions, add an external guide.

■ Allowable Load Mass for Horizontally Mounted RCS4-RRA Series

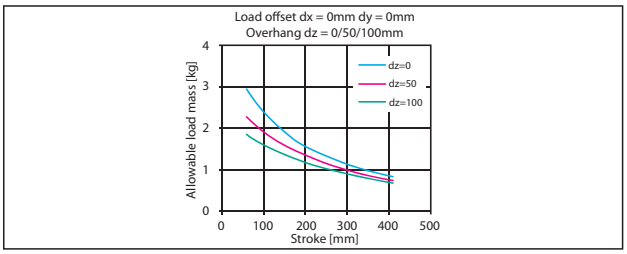
[Horizontally mounted, laid flat]

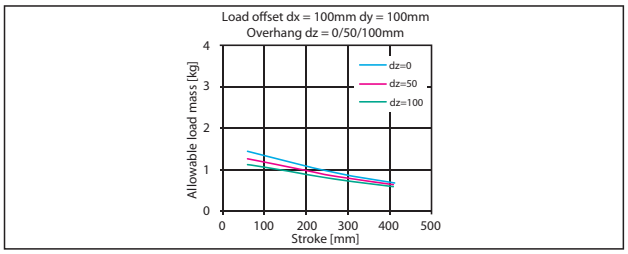


[Horizontally mounted, laid on its side]

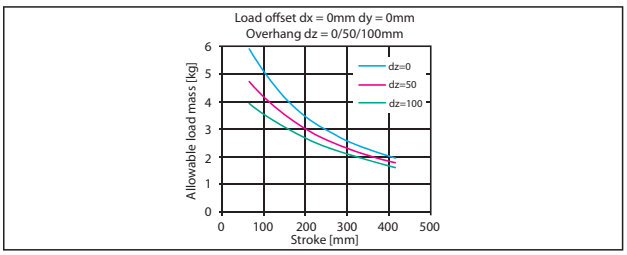


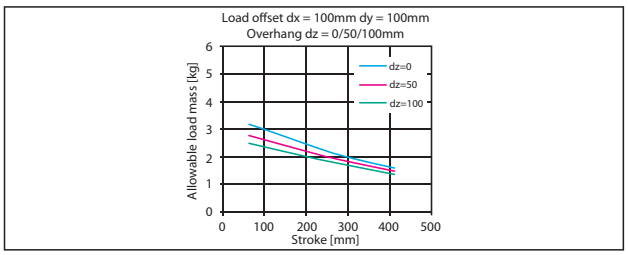
■ RCS4-RRA4



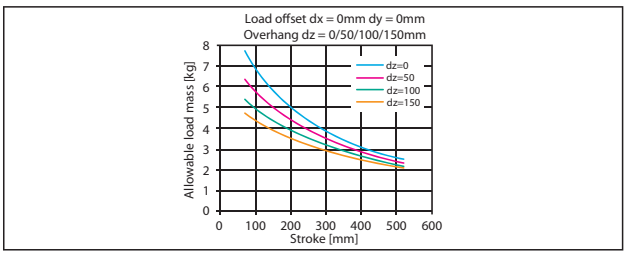


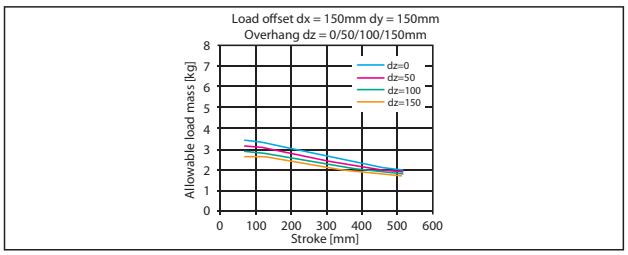
■ RCS4-RRA6



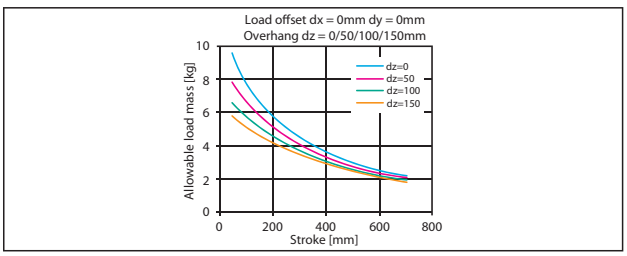


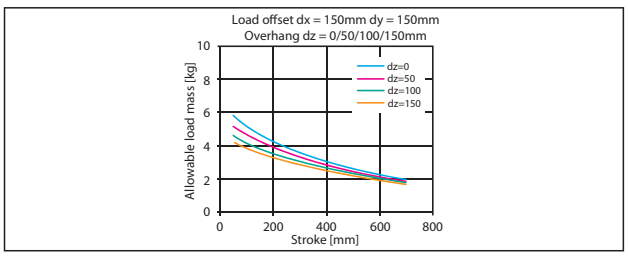
■ RCS4-RRA7





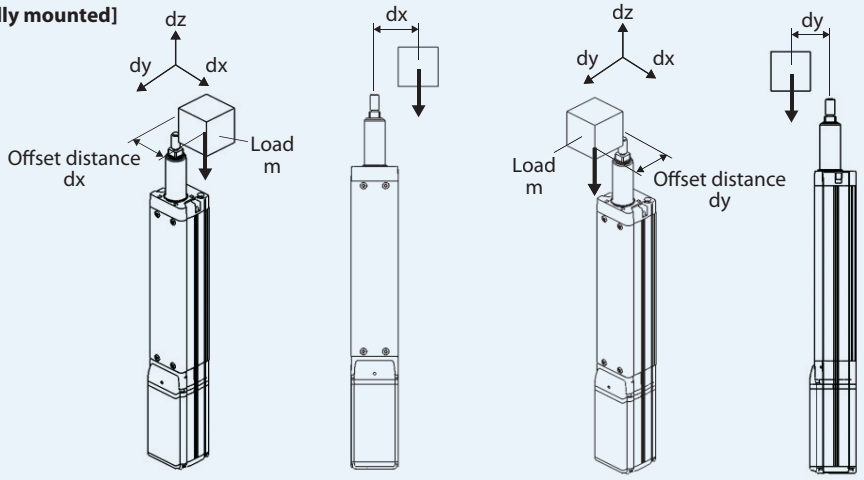
■ RCS4-RRA8





■ Allowable Load Mass for Vertically Mounted RCS4-RRA Series

[Vertically mounted]



Allowable load calculation conditions.
Load mass corresponding to a product service life of 5,000 km, considering moments generated by acceleration/deceleration.
(Acceleration: 0.5G, speed: 500mm/s)

Due to the table type structure, longer stroke actuators result in lower allowable load mass.

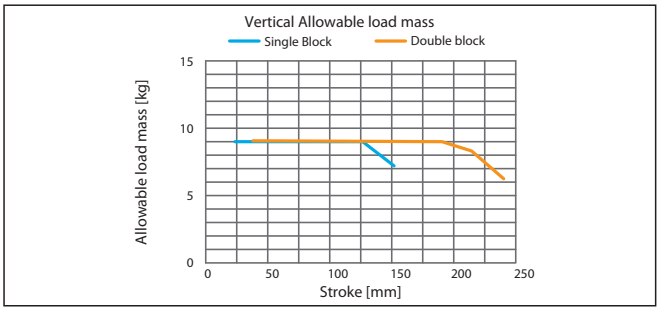
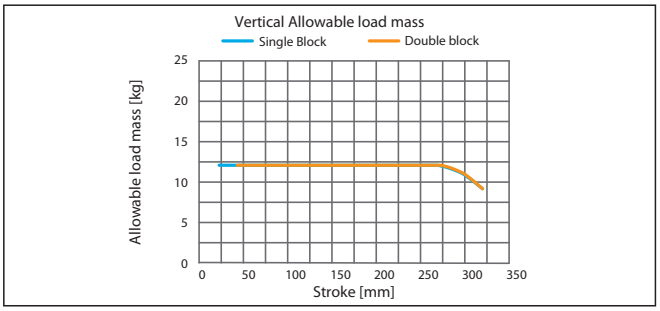
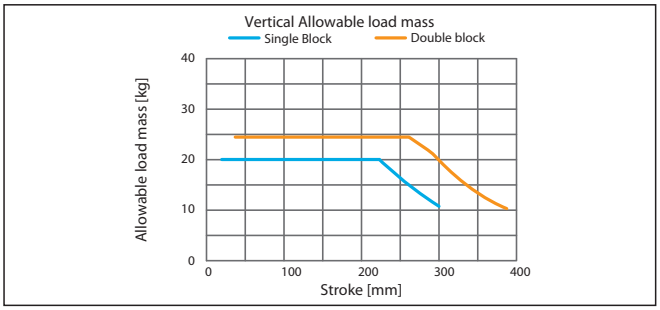
■ RCS4-TA4



■ RCS4-TA6



■ RCS4-TA7



Duty

Duty cycle varies depending on the operation conditions (payload, acceleration/deceleration, etc.).

Calculate the load factor LF and acceleration/deceleration time ratio t_{od} from the following formula and obtain it from the graph.

❶ Calculate the load factor LF from the following formula.

RCS4 can be used at or above the rated acceleration/deceleration.

The formula will differ depending on the command acceleration/deceleration.

(1) When the command acceleration/deceleration is at or below the rated acceleration/deceleration, use formula Ⓐ.

The load factor LF formula differs depending on the model. Check the target model and calculate the load factor.

Ⓐ Load factor: LF ① $= \dfrac{M \times \alpha}{M_1 \times \alpha_1}$ (%)

- Payload at rated acceleration : M_1
- Rated acceleration/deceleration : A_1
- Actual payload : M ($M \leq M_1$)
- Command acceleration/deceleration : A ($\alpha \leq \alpha_1$)

(Note) Please refer to the model number/spec table of each model for payload and rated acceleration/deceleration at rated acceleration/deceleration.

(2) When the command acceleration/deceleration is higher than the rated acceleration/deceleration, use formula Ⓑ.

Ⓑ Load factor: LF ② $= \dfrac{M \times \alpha}{M_2 \times \alpha} = \dfrac{M}{M_2}$ (%)

- Actual payload : M
- Command acceleration/deceleration : A
- Payload of command acceleration/deceleration : M_2 ($M \leq M_2$)

(Note) For the acceleration/deceleration of each model and the payload corresponding to that acceleration/deceleration, refer to the table of payload by acceleration for each model.

The load factor is as follows when operating under the following operating conditions.

As an example, we will use the table of payload by acceleration of "RCS4-SA8C 400 W Lead 30".

Model	Type	Motor wattage	Lead [mm]	Payload by Acceleration/Deceleration [kg]				
				0.3G	0.5G	0.7G	1G	1.2G
RCS3	SA8C	400W	30	30	25	20	15	10

(Note) When horizontally mounted, the rated acceleration/deceleration is 0.3G

<Example 1>

Actual payload	: 12kg
Command acceleration/deceleration	: 1.0G
Payload of command acceleration/deceleration	: 15kg
Load factor: LF ②	= 80%

<Example 2>

Actual payload	: 12.5kg
Command acceleration/deceleration	: 0.5G
Payload of command acceleration/deceleration	: 25kg
Load factor: LF ②	= 50%

<Example 3>

Actual payload	: 30kg
Command acceleration/deceleration	: 0.3G
Payload of command acceleration/deceleration	: 30kg
Load factor: LF ③	= 100%

(Note) Use load factor calculation method Ⓐ.

❷ Calculate the acceleration/deceleration time ratio t_{od} from the following formula.

Acceleration/deceleration time ratio: $t_{od} = \dfrac{\text{Acceleration time + deceleration time}}{\text{Operating time}}$ %

Acceleration time $= \dfrac{\text{Speed (mm/s)}}{\text{Acceleration (mm/s}^2\text{)}}$ (s)

Acceleration (mm/s^2) = Acceleration (G) × 9,800mm / s^2

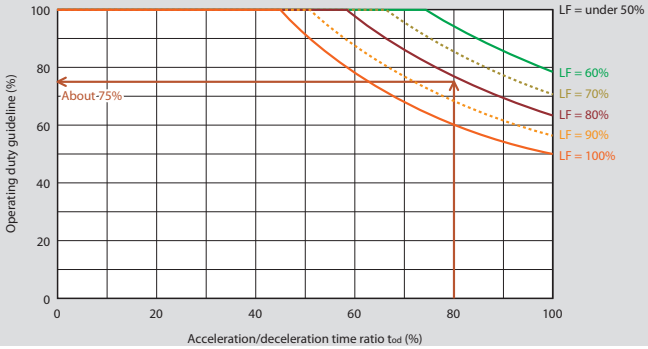
Deceleration time $= \dfrac{\text{Speed (mm/s)}}{\text{Deceleration (mm/s}^2\text{)}}$ (s)

Deceleration (mm/s^2) = Deceleration (G) × 9,800mm/s^2

❸ Read the duty guideline from calculated "load ratio" and "acceleration/deceleration time ratio".

Duty guideline graph 1 (for standard use)

Example: When the load ratio is 80% and the acceleration/deceleration time ratio is 80%, the duty guideline will be approximately 75%.



RCS4(CR) Double Slider Specification

* Double slider specification values obtained by subtracting the payload compensation value from the standard specification payload are the payload specification values.
(Note) Double slider is not configured for leads not listed in the table.

SCON-CB

Single axis robot / Cartesian robot / Linear servo / ROBO Cylinder RCS2/RCS3/ RCS4 position controller

Features

1 Supports Battery-less Absolute Encoder

The RCS2, RCS3, RCS4, ISB and ISDB can operate equipped with a battery-less absolute encoder. As no battery is needed for retaining position data, it is possible to save control panel space, which helps to keep down the initial costs and maintenance costs.

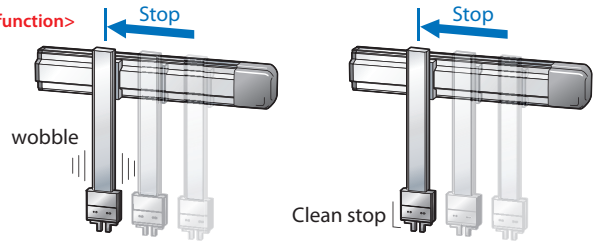
2 Major field networks supported <Optional function>

Direct connection can be made to MECHATROLINK, CompoNet, EtherCAT, EtherNet/IP and PROFINET IO in addition to DeviceNet, CC-Link and PROFIBUS-DP. Operation is also possible by specifying the coordinate values directly via the field network.

DeviceNet™ PROFIBUS® CompoNet™ CC-Link EtherNet/IP™ EtherCAT® MECHATROLINK PROFINET®

3 Equipped with vibration control function <Standard function>

The equipped vibration control function reduces the runout (vibration) of the workpiece attached to the slider of the actuator. The standby time for vibration convergence is shortened, reducing the cycle time.



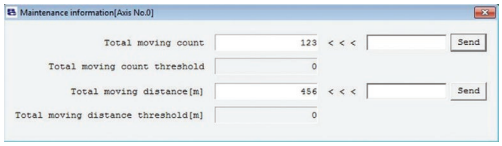
Without vibration control
There is vibration after stopping.

With vibration control
There is almost no vibration after stopping.

4 Capable of predictive maintenance <Standard function>

- A function that issues a warning when a motor overload is detected has been included
  Monitoring changes in the temperature of the motor makes it possible to detect abnormalities before the occurrence of a breakdown or a malfunction.
- Improvement of monitoring functions
  Similar to an oscilloscope, it is now possible to acquire the waveforms of the position, speed, etc. from the instant the state of the selected signal changes. Also, it is possible to acquire the signal states of positioning complete, alarms, etc.
- Smart tuning and off-board tuning enable acceleration/deceleration and gain adjustment according to the payload.
- A function that integrates the number of cycles with the traveled distance accumulation makes it possible to check maintenance timing.
- The calendar function makes it possible to keep a timetable of the alarms that have been generated.

<Maintenance information>



<Calendar function>

CGB	Safety category type

Motor Type

12	12W	150	150W
20	20W	200	200W
30D	30W	200S	200W
30R	30W	300S	300W
60	60W	400	400W
100	100W	600	600W
100S	100W	750	750W

(Example) 12:12W servo motor supported

Encoder Type

WAI	Battery-less Absolute Incremental
A	Absolute
G	Quasi absolute *1
AI	Index absolute type *2
AM	Absolute Multi-rotation type *2

*1 The quasi absolute is for LSAS Series.
*2 DD motor operation mode is added.

Options

HA	Hi-accel./decel. specification

* High acceleration/deceleration specification is only available if the high acceleration/deceleration supported option is selected for the actuator.

<High Acceleration/Deceleration Target Actuators>
RCS2-SA4C/SA5C/SA6C/SA7C/RA4C/RA5C/RGS4C/RGS5C/RGD4C/RGD5C

I/O Type

NP	PIO NPN spec. (Standard)
PN	PIO PNP spec.
DV	DeviceNet connection specification
CN	CompoNet connection specification
CC	CC-Link connection specification
ML	MECHATROLINK-I, II connection specification (Note 1)
ML3	MECHATROLINK-III connection specification (Note 1)
PR	PROFIBUS-DP connection specification
EC	EtherCAT connection specification
EP	EtherNet/IP connection specification
PRT	PROFINET IO connection specification

(Note 1) For precautions during selection, be sure to contact IAI America for more details.

I/O Cable Length

0	No cable
2	2m(Standard)
3	3m
5	5m

* When a field network specification is selected, the I/O cable length is "O" (No cable).

Input power

1	Single phase 100VAC
2	Single phase 200VAC

* Check the power supply voltage that can be selected in the actuator page.

Notes

In principle, the same type of motor as the type of motor of the actuator to be connected should be entered, but there are some models where the motor type of some controllers and actuators do not match.
Be sure to check the corresponding models listed below during selection.

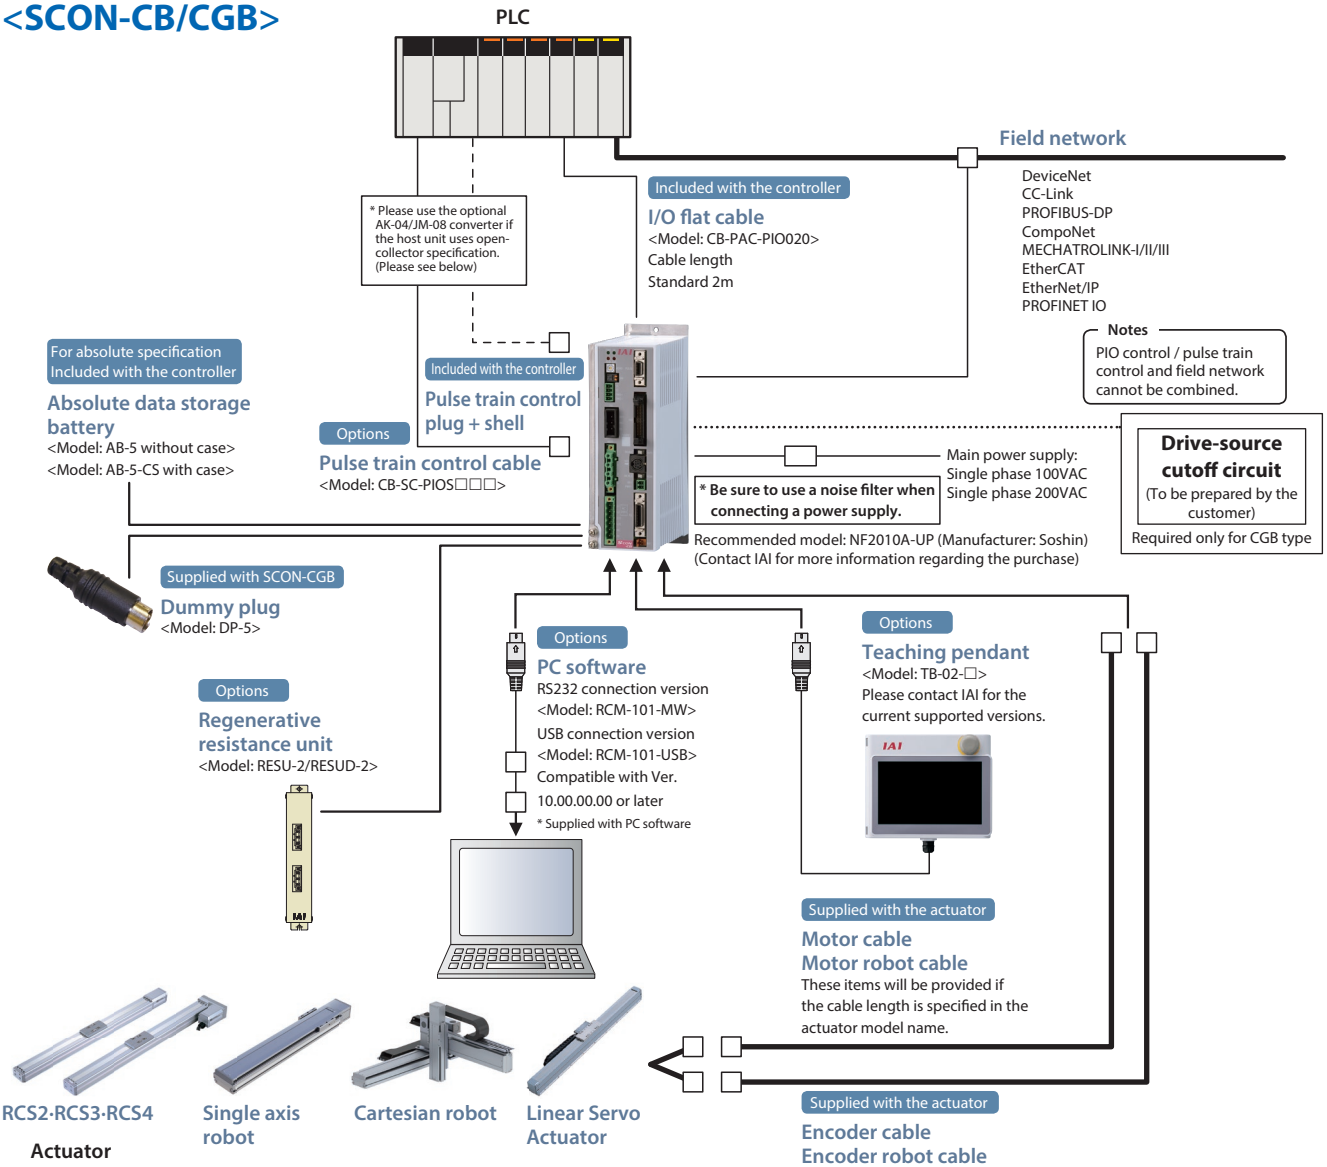
<30D/30R/200S Target Actuators>

● Controller motor type [30D]
30W actuators other than RS

● Controller motor type [30R]
RS

● Controller motor type [200S]
DD-LT18□ DDCR-LT18□
DDA-LT18C DDACR-LT18C
* For 200S, the controller casing will be 400W. Check the 400W specification for the price.

<SCON-CB/CGB>



Actuator
RCS2 Series* / RCS3 Series / RCS4 Series
Single axis robot/Cartesian robot/Linear servo actuator

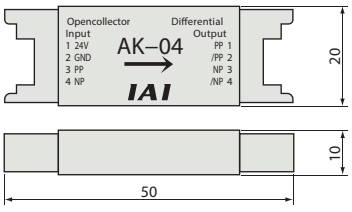
* RCS2/RA13R has different wiring. Please contact IAI America for more details.

■ Pulse Converter: Model AK-04

Converts open-collector specification pulses to the differential system.
Please use this converter if the host controller uses open-collector specification for output pulse.

■ Specifications

Item	Specification
Input power	24VDC ±10% (Max. 50mA)
Input pulse	Open collector (collector current max. 12mA)
Input frequency	200kHz or less
Output pulse	Differential output (Max. 10mA) (26C31 or equivalent)
Mass	10g or less (not including the cable connectors)
Accessories	37104-3122-000L (e-CON connector) x 2 by 3M Suitable power line AWG No.24~26

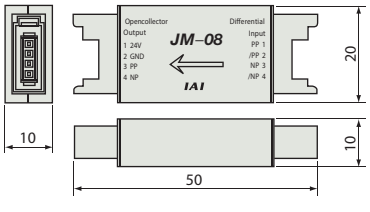


■ Pulse Converter: Model JM-08

Converts differential pulses to the open-collector specification.
Please use this converter if the host controller uses open-collector specification for pulse input.

■ Specifications

Item	Specification
Input power	24VDC ±10% (Max. 50mA)
Input pulse	Differential input (Max. 10mA) (RS422 compliant)
Input frequency	500kHz or less
Output pulse	24VDC open collector (collector current max. 25mA)
Mass	10g or less (not including the cable connectors)
Accessories	37104-3122-000FL (e-CON connector) x 2 by 3M Suitable power line AWG No.24~26



Operation mode

The control method of this controller can be selected from positioner mode and pulse train control mode.
In positioner mode, it can be operated by specifying the position data (travel position, speed, acceleration, etc.) numbers input to the controller from the outside using I/O (input/output signal).
As well, in positioner mode, 8 different operation modes can be selected depending on the parameters.
In pulse train control mode, it is possible to control the travel distance, speed, acceleration and the like with pulses sent from an external pulse generator.

Mode		Type	Number of positioning points	Features
Positioner mode	Positioning mode	PIO pattern 0	64 points	This is the factory default standard mode. Specify from outside the position number you want to move.
	Teaching mode	PIO pattern 1	64 points	In this mode, the slider (rod) can be moved with an external signal to register the stop position as position data.
	256-point mode	PIO pattern 2	256 points	In this mode, the number of positioning points in positioning mode is increased to 256.
	512-point mode	PIO pattern 3	512 points	In this mode, the number of positioning points in positioning mode is increased to 512.
	Solenoid valve mode 1	PIO pattern 4	7 points	This mode allows travel by signal ON/OFF alone, as with air cylinder solenoid valves.
	Solenoid valve mode 2	PIO pattern 5	3 points	In solenoid valve mode, the output signal is the same as the air cylinder auto switch.
	Force control mode 1	PIO pattern 6	32 points	In this mode, position movement during force control can be done with positioning mode. (The maximum number of positioning points is 32)
	Force control mode 2	PIO pattern 7	5 points	In this mode, position movement during force control can be done with solenoid valve mode. (The maximum number of positioning points is 5)
Pulse train control mode	Pulse train control mode for incremental	PIO pattern 0	—	Position data input to the controller is not required, as operation is according to the transmitted pulses.
	Pulse train control mode for absolute	PIO pattern 1		

Table of I/O Signals * I/O signal assignment can be selected from 9 types.

Pin No.	Category		Parameter (PIO pattern) selection

* Parentheses in the above symbol names show functions before home return.
* The above signal names marked with * are set to OFF when the actuator is operating.
Note 1: Used only with pulse train control mode PIO pattern 1

Field Network Specification: Explanation of Operation Modes

If the SCON-CB is controlled via a field network, you can select one of the following nine modes to operate the actuator. Please note that the data areas required on the PLC side will vary depending on the mode.

■ Mode Description

	Mode	Description
0	Remote I/O mode	Similarly to the PIO specification, this mode operates by directing bytes to ON/OFF via a network. The number of positioning points and functions will vary depending on the operation patterns (PIO patterns) set by the controller's parameters.
1	Position/simple direct value mode	The target position value is directly input, while all other operational conditions (speed, acceleration, etc.) are set by indicating the position number corresponding to the desired operating conditions from the position data table.
2	Half direct value mode	The actuator is operated by directly inputting values for speed, acceleration/deceleration rate and push current, as well as the target position.
3	Full direct value mode	The actuator is operated by directly inputting values for the target position, speed, acceleration/deceleration rate and push current limit value, etc. In addition, you are able to read the current position, current speed, and the command current value, etc.
4	Remote I/O mode 2	This mode is the same as the remote I/O mode above, with the added functionality of reading current position and the command current value.
5	Position/simple direct value mode 2	This mode is equipped with a force control function instead of the teaching and zone functions of the position/simple direct value mode above.
6	Half direct value mode 2	Instead of the half direct value mode command current reading function, it can read load cell data. It also supports the force control function.
7	Remote I/O mode 3	This mode is the same as the remote I/O mode above, with the added functionality of reading current position and load cell data.
8	Half direct value mode 3	This mode supports the vibration control function instead of the jog function of the half direct value mode.

■ Required Data Size for Each Network

	Mode	DeviceNet	CompoNet	CC-Link	MECHATROLINK-I, II	PROFIBUS-DP	EtherCAT	EtherNet/IP	PROFINET IO
0	Remote I/O mode	2 bytes	2 bytes	1 station	2 bytes	2 bytes	2 bytes	2 bytes	2 bytes
1	Position/simple direct value mode	8 bytes	8 bytes	1 station	8 bytes	8 bytes	8 bytes	8 bytes	8 bytes
2	Half direct value mode	16 bytes	16 bytes	2 stations	16 bytes	16 bytes	16 bytes	16 bytes	16 bytes
3	Full direct value mode	32 bytes	32 bytes	4 stations	× (Note 1)	32 bytes	32 bytes	32 bytes	32 bytes
4	Remote I/O mode 2	12 bytes	12 bytes	1 station	12 bytes	12 bytes	12 bytes	12 bytes	12 bytes
5	Position/simple direct value mode 2	8 bytes	8 bytes	1 station	8 bytes	8 bytes	8 bytes	8 bytes	8 bytes
6	Half direct value mode 2	16 bytes	16 bytes	2 stations	16 bytes	16 bytes	16 bytes	16 bytes	16 bytes
7	Remote I/O mode 3	12 bytes	12 bytes	1 station	12 bytes	12 bytes	12 bytes	12 bytes	12 bytes
8	Half direct value mode 3	16 bytes	16 bytes	2 stations	16 bytes	16 bytes	16 bytes	16 bytes	16 bytes

(Note 1) Please note that the MECHATROLINK specification does not support the full direct value mode.

■ List of Functions by Operation Mode

	Remote I/O mode	Position/simple direct value mode	Half direct value mode	Full direct value mode (Note 1)	Remote I/O mode 2	Position/simple direct value mode 2	Half direct value mode 2	Remote I/O mode 3	Half direct value mode 3
Number of positioning points	512 points	768 points	Unlimited	Unlimited	512 points	768 points	Unlimited	512 points	Unlimited
Operates by direct assignment of position data	×	○	○	○	×	○	○	×	○
Direct assignment of speed/acceleration	×	×	○	○	×	×	○	×	○
Push-motion operation	○	○	○	○	○	○	○	○	○
Current position read	×	○	○	○	○	○	○	○	○
Current speed read	×	×	○	○	×	×	○	×	○
Operation by position number input	○	○	×	×	○	○	×	○	×
Completed position number read	○	○	×	×	○	○	×	○	×
Force control	△ (Note 2)	×	×	○	△ (Note 2)	○	○	△ (Note 2)	×
Vibration control	○	○	×	○	○	○	×	○	○
Servo gain switching	○	○	○	○	○	○	×	○	○

* ○ indicates that the operation is supported, and X indicates that it is not supported.
(Note 1) Please note that the MECHATROLINK specification does not support the full direct value mode.
(Note 2) Usable when PIO pattern is set to 6 or 7.

Positioning Mode / Teaching Mode / Solenoid Valve Mode

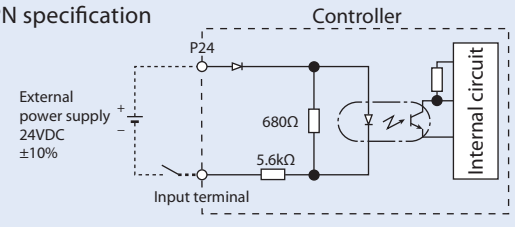
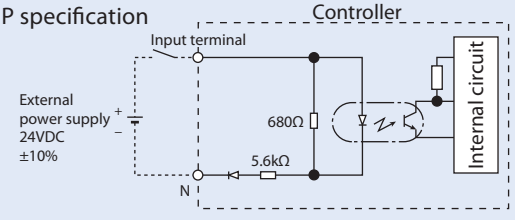
Input External input specification

Item	Specification
Input voltage	24VDC ±10%
Input current	4mA/circuit
ON/OFF voltage	ON voltage: Min. 18.0VDC OFF voltage Max. 6.0VDC
Isolation method	Photocoupler

NPN specification



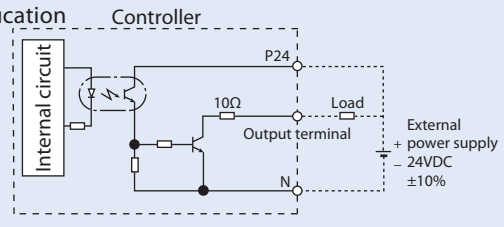
PNP specification



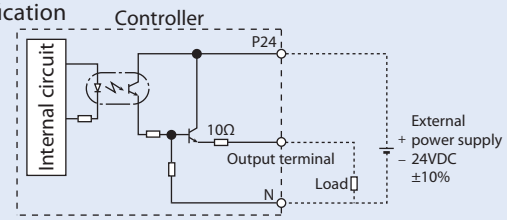
Output External output specification

Item	Specification
Load voltage	24VDC
Maximum load current	50mA/point
Leakage current	Max. 0.1mA/point
Isolation method	Photocoupler

NPN specification



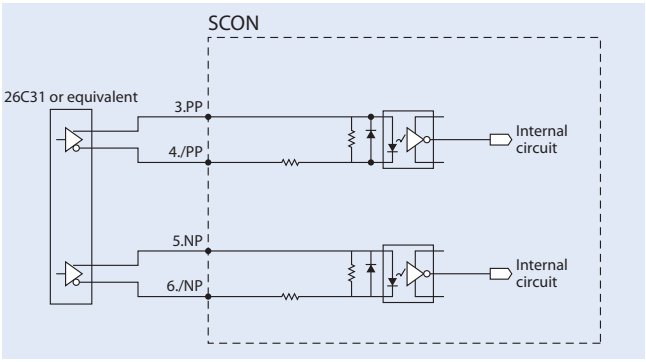
PNP specification



Pulse Train Type Input/Output Specification (differential line driver specification)

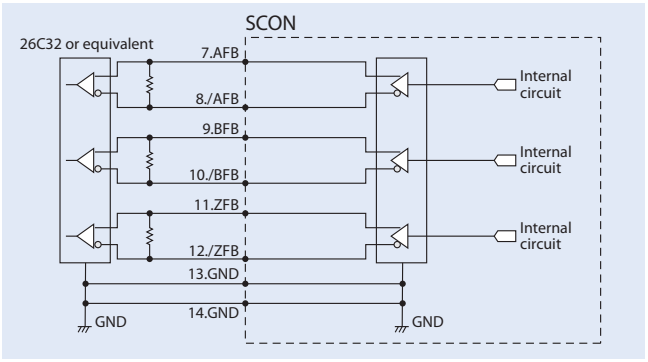
■ Input part

Maximum input pulse : Line driver interface 2.5Mpps
Isolation method : Photocoupler isolation



■ Output part

Maximum output pulse : Line driver interface 2.5Mpps
Isolated/Non-isolated : Non-isolated

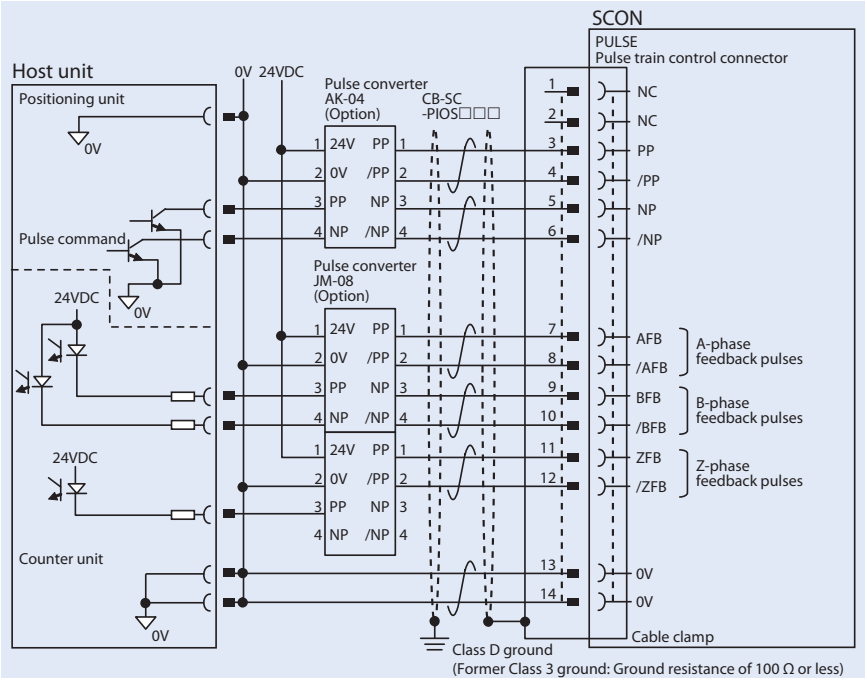


Pulse Train Type Input/Output Specification (open collector specification)

The AK-04 (optional) is needed to input pulses. The JM-08 (optional) is required for pulse train output.

Maximum input pulse : 200kpps (AK-04 required)
Maximum output pulse : 500kpps (JM-08 required)

* The 24VDC power supply connected to the AK-04 should be common with the PIO interface power supply.
* Make sure that the cable between the pulse output unit (PLC) and AK-04/JM-08 is as short as possible.
Also, make sure that the cable length **between AK-04/JM-08 and the pulse connector is within 2m.**



Notes
Use the same power supply for open collector input/output to/from the host and for the AK-04 and JM-08.

Command Pulse Input Patterns

	Command pulse train pattern	Input terminal	Forward	Reverse
Negative logic	Forward pulse train	PP·/PP		
	Reverse pulse train	NP·/NP		
	A forward pulse train indicates the amount of motor rotation in the forward direction, while a reverse pulse train indicates the amount of motor rotation in the reverse direction.			
	Pulse train	PP·/PP		
	Sign	NP·/NP	Low	High
	The command pulses indicate the amount of motor rotation, while the sign indicates the rotating direction.			
	Phase A/B pulse train	PP·/PP		
		NP·/NP		
	Command phases A and B pulse having a 90° phase difference (multiplier is 4) indicate the amount of motor rotation and the rotating direction.			
Positive logic	Forward pulse train	PP·/PP		
	Reverse pulse train	NP·/NP		
	Pulse train	PP·/PP		
	Sign	NP·/NP	High	Low
	Phase A/B pulse train	PP·/PP		
		NP·/NP		

Specifications Table

Item		Specification	
Compatible motor capacity		Less than 400W	400W or more
Number of controlled axes		1-axis	
Method of operation		Positioner type/Pulse train type	
Number of positioning points		512 points (PIO specification), 768 points (fieldbus specification)	
Backup memory		Non-volatile memory (FRAM)	
I/O connector		40-pin connector	
Number of I/O points		Input 16 points / output 16 points	
I/O power supply		External supply 24VDC ±10%	
Serial communication		RS485 1ch	
Command pulse train input method (Note 1)		Differential line driver output supported	
Maximum input pulse frequency		Differential line driver system: Max. 2.5Mpps / Open collector system (pulse converter used): Max. 200kpps	
Position detection method		Incremental encoder / absolute encoder / serial encoder quasi absolute / battery-less absolute encoder	
Drive-source cutoff function		CB: available (relay built in) CGB: not available	
Electromagnetic brake forced release		External brake release switch ON/OFF	
Input power		Single phase 100~115VAC ±10% Single phase 200~230VAC ±10%	Single phase 200~230VAC ±10%

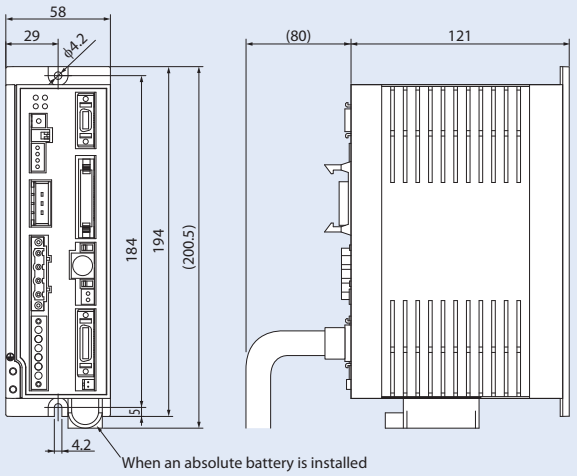
Vibration resistant		X, Y, and Z directions 10~57Hz Single-side width 0.035mm (continuous), 0.075mm (intermittent) 58~150Hz 4.9m/s² (continuous), 9.8m/s² (intermittent)	
Calendar/clock functionality	Retention time	Approx. 10 days	
	Charging time	Approx. 100 hours	
Protection functionality		Overcurrent, abnormal temperature, fan speed degradation monitoring, encoder disconnection, etc.	
Ambient operating temperature		0 to 40°C	
Ambient operating humidity		85% or less (Non-condensing)	
Operating ambience		Free from corrosive gases	
Ingress protection		IP20	
Mass		Approx. 900g (25g added for simple absolute specification)	Approx. 1.2kg (25g added for simple absolute specification)
External dimensions		58mm(W)×194mm(H)×121mm(D)	72mm(W)×194mm(H)×121mm(D)

(Note 1) Use a differential line driver method resistant to noise for the command pulse input method.
If the open collector method must be used, convert the pulse to differential using the optional pulse converter (AK-04/JM-08).
(Note 2) External dimensions of controllers under 400W that operate models marked with (*) are that of 400W or more.

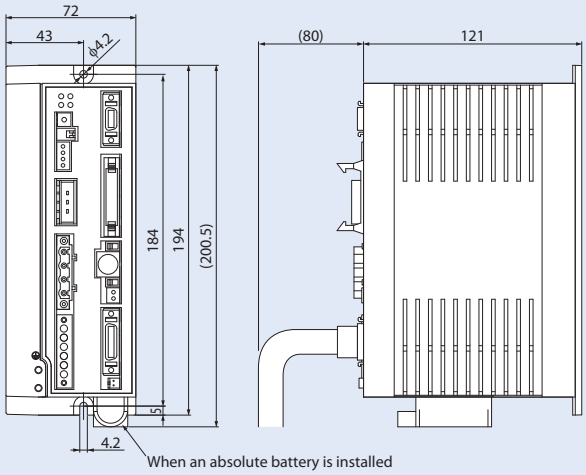
* The number of encoder pulses of actuators that can be operated with SCON-CB is 3,072 pulses for RCS2-SRA7BD/SRGS7BD/SRGD7BD, 1,600 pulses for RCS2-□□5N (incremental), 1,048,576 pulses for DD-□18P: 20 bits, 131,072 pulses for DD-□18S: 17 bits, 2,400 pulses for NS-S□M□ (incremental), 131,072 pulse for ISB (battery-less absolute) and 16,384 pulses for all other models.

External Dimensions

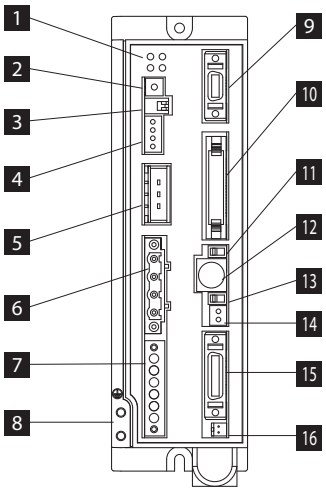
Less than 400W

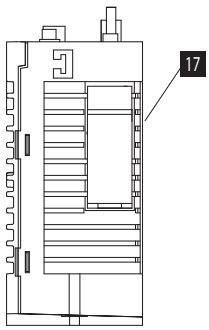


400W or more



Name of Each Component





1 LED display

It represents the state of the controller.

Name	Color	Description
PWR	Green	Lights up on system-ready (after the power is turned on, in normal CPU)
SV	Green	Lights up on servo-on
ALM	Orange	Lights up on alarm
EMG	Red	Lights up on emergency stop

2 Rotary switch

Used to set up the controller address after connecting the controller in order to identify every controller connected.

3 Piano switch

Switch for the controller system.

Name	Description
1	Press-operation mode selection switch OFF: Positioner mode, ON: Pulse train control mode * Enabled at power on.
2	Used by the manufacturer for adjustment. Always keep this switch OFF.

4 System I/O connector

Connector for emergency stop switch, etc.

5 Regenerative resistance unit cable connector

Resistance unit connector for absorbing regenerative current that occurs when the actuator decelerates to a stop.

6 Motor connector

Connector for motor cable of actuator.

7 Power supply connector

Connector for the AC power supply. It has divided inputs on the control power supply side and motor power supply side.

8 Ground terminal

Screw for protective grounding. Be sure to ground.

9 Pulse train control connector

Connector used when operating in pulse train control mode. Feedback pulses are also enabled in positioner mode.

10 PIO connector

Cable connector for performing parallel communication with peripheral devices such as PLC.

11 Operation mode selection switch

Name	Description
MANU	Does not accept commands from PIO.
AUTO	Ready to accept commands from PIO.

* The emergency stop switch on the teaching pendant is enabled when the connection is made, regardless of the states, AUTO or MANU. Be sure to turn OFF the power when disconnecting the teaching pendant and SIO communication cable.

12 SIO connector

Connector for teaching pendant or PC communication cable.

13 Brake release switch

Used to forcibly release the electromagnetic brake installed in the actuator.

* To release the brake, the power supply (24VDC) for driving brake must be connected.

14 Brake power supply connector

Brake power 24VDC supply connector (required only when a brake-equipped actuator is connected).

15 Encoder/sensor connector

Connector for encoder/sensor cable.

16 Connector for the absolute data backup battery

Absolute data backup battery connector (required only for the absolute encoder specifications).

17 Absolute battery holder

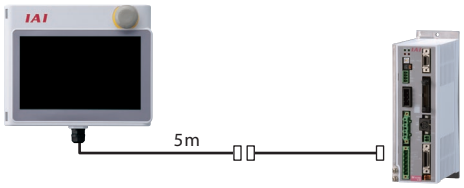
Battery holder for installing the absolute data backup battery.

Touch panel teaching pendant

■ **Features** A teaching device equipped with functions such as position teaching, trial operation, and monitoring.

■ **Model** **TB-02-C**

■ **Configuration**



■ **Specifications**

Rated voltage	24V DC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 to 40℃
Ambient operating humidity	20~85% RH (Non-condensing)
Environmental resistance	IP20
Mass	470g (TB-02 unit only)

PC software (Windows only)

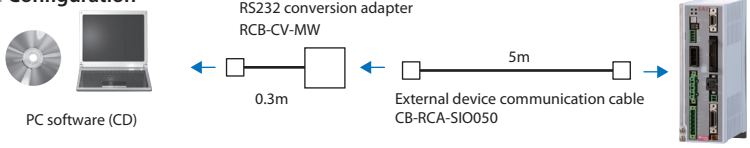
■ **Features** The start-up support software which comes equipped with functions such as position teaching, trial operation, and monitoring.
A complete range of functions needed for making adjustments contributes to shortened start-up time.

XP SP2 or later / Vista / 7 / 8

■ **Model** **RCM-101-MW** (with an external device communication cable + RS232 conversion unit)

■ **Configuration**

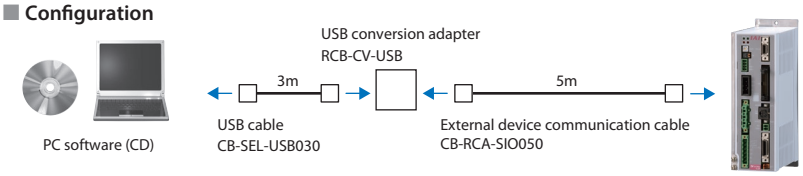
Compatible with Ver. 10.00.00.00 or later



■ **Model** **RCM-101-USB** (with an external device communication cable + USB conversion adapter + USB cable)

Compatible with Ver. 10.00.00.00 or later

■ **Configuration**



Regenerative resistance unit

■ **Features** Unit that converts the regenerative current generated in motor deceleration to heat.
Check the total W of the actuator to be operated in the table below, and prepare one if regenerative resistance is required.

* If two regenerative units are required, please prepare RESU-2 and RESU-1 (Consult IAI America for more information).

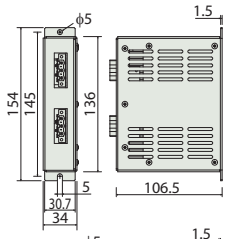
■ **Model** **RESU-2** (standard specification)**/RESUD-2** (DIN rail mounting specification)

■ **Specifications**

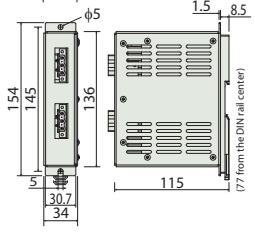
Model	RESU-2	RESUD-2
Unit weight	About 0.4kg	
Built-in regenerative resistance value	235Ω 80W	
Unit mounting method	Screw mount	DIN rail mount
Attached cable	CB-SC-REU010	

■ **External Dimensions**

<RESU-2>



<RESUD-2>



■ **Necessary Amount Guideline**

	Horizontal	Vertical
0	~100W	~100W
1	~400W	~400W
2	~750W	~750W

* Depending on the operating conditions, a regeneration resistance higher than that mentioned above may be necessary.
* The measure of linear servo actuator is in the table above. However, one unit is required for the LSA/LSAS-N10S type.

■ **Necessary Amount Guideline (RCS2-RA13R)**

	Lead 2.5	Lead 1.25
Horizontal	1	**0**
Vertical	1	**1**

* Depending on the operating conditions, a regeneration resistance higher than that mentioned above may be necessary.

■ **Necessary Amount Guideline (DD)**

Series	Type	Required number
DD ~ DDA	LT18□ ~ LH18□	1 ~ 2

Absolute data storage battery

■ **Features** Absolute data storage battery for operating an actuator of the absolute specification.

■ **Model** **AB-5 (battery)**
AB-5-CS (with case)

Dummy plug

■ **Features** This is required when the safety category specification (SCON-CGB) is used.

■ **Model** **DP-5**

Maintenance Parts

When placing an order for a replacement cable, please use the model name shown below.

■ Cable Compatibility Chart

Off board tuning compatible with RCS4-SA4C/R、SA6C/R、SA7C/R、SA8C/R

1. Contents

RCS4-SA series supports off-board tuning.
Please check the attached payload table with acceleration / deceleration.
Depending on the model, it supports up to 4.5G horizontally and 3G vertically.

2. Applicable controller

SCON-CB、RCON-SC、SCON-CAL、MSCON-C
*SCON-CAL does not support servo monitor.

3. Corresponding timing

The above controller is compatible

4. Corresponding tool

RC PC software V13.01.00.00 or later
TB-02/03：V2.60

RCS4-SA4C
